INTRODUCING PROFILING BEDS

Harvest Healthcare manufacture a wide range of profiling beds, designed to provide support to a variety of service users. The exclusive range of Woburn beds offer ease of movement to both service user and carer, providing a higher quality of life. Safety, durability and variety are key aspects in the design ethos - each bed has something different to offer.

The Woburn beds are built to comply with Bed Rail Regulations. This allows rails to be used on beds without compromising safety for the user. Identifying the needs of the service user before choosing a bed is of great importance. Harvest Healthcare have a knowledgeable team, able to provide you with enough information to make such a decision.

A nationwide team of engineers are on hand to install, provide training and service profiling beds. At Harvest Healthcare, we provide a cost-effective, quality service with an honest approach – preferring to repair rather than replace wherever possible.

Our compliance checks ensure all equipment serviced by Harvest Healthcare is reliable and efficient, enabling staff to fully carry out their role effectively. Health and safety of service users and staff is important to us, so with ongoing support through regular training sessions and equipment audits, we will ensure that quality of patient care increases and professional standards are maintained.

BEDS

HLB791.03 - WOBURN BED

The quality features and reliability of the Woburn profiling bed provide outstanding comfort and ease of care for occupant and carer.

The robust wooden side rails are collapsible below mattress level, and extend higher to allow a safe mattress depth of 205mm, giving scope for improved pressure relief and comfort.

Adjustment of back rest, knee break and platform height can all be done at the touch of a button.

This bed is available in oak and walnut colours.

FEATURES

- Low voltage
- Lockable handset
- Max. patient weight 185kg/ 29 Stone
- SWL 220 kg / 34 Stone
- Optional wooden side rails
- Variable height (365 - 795mm)
- Auto-regression (optional)
- Trendelenburg (optional)
- Emergency battery backup
- Electric backrest and knee break with mechanical lower leg support
- Wraparound wooden head and foot boards
- Compatible with environmental control system
- Comes with a 5-year warranty

Oak

Walnut

CODE	DIMENSIONS	HEIGHT	SWL
HLB791.03	2135 x 1025mm	365 - 795mm	220kg/34 Stone

WOBURN LOW

HLB797.03 - WOBURN LOW

This dependable 4-section profiling bed features a high quality control system, a reduced minimum platform height and a higher load capacity.

By lowering the platform to only 220mm from floor level, the risk of injury for those with a tendency to roll out of bed is significantly reduced.

This bed is available in oak and walnut colours.

FEATURES

- Low voltage
- Lockable handset
- Max. patient weight 185kg/ 29 Stone
- SWL 220 kg / 34 Stone
- Optional wooden side rails
- Emergency battery backup
- Variable height (220 - 650mm)
- Auto-regression (optional)
- Trendelenburg (optional)
- Electric backrest and knee break with mechanical lower leg support
- Wraparound wooden head and foot boards
- Compatible with environmental control system
- Comes with a 5-year warranty

WOBURN COMMUNITY

BEDS

7

BEDS

HLBC791.02 - WOBURN COMMUNITY

Designed to fit within the community markets, the Woburn Community profiling bed is built with the same quality across the range - at a more cost-effective price.

Vinyl coated, the bed aids with cleaning and infection control. It is also suited for multiple dismantles across the community, part of the more robust design.

FEATURES

- Low voltage
- Lockable handset
- Max. patient weight 185kg/ 29 Stone
- SWL 220 kg / 34 Stone
- Optional wooden side rails
- Emergency battery backup
- Variable height (380 - 800mm)
- Auto-regression (optional)
- Electric backrest and knee break with mechanical lower leg support
- Designed for easy cleaning to aid infection control
- Trendelenburg as standard
- Compatible with environmental control system
- Comes with a 5-year warranty

CODE	DIMENSIONS	HEIGHT	SWL
HLBC791.02	2115 x 1015mm	380 - 800mm	220kg/34 Stone

WOBURN COMMUNITY LOW

HLBC791L - WOBURN COMMUNITY LOW

In addition to the Woburn Community, the Woburn Community Low profiling bed features a lower entry and exit height. Ideal for many community environments, the bed will lower to 220mm from ground level, allowing for easy access to service users.

The handset is lockable to prevent tampering by those other than carers.

FEATURES

- Low voltage
- Lockable handset
- Max. patient weight 185kg/ 29 Stone
- SWL 220 kg / 34 Stone
- Optional wooden side rails
- Emergency battery backup
- Variable height (220 - 640mm)
- Electric backrest and knee break with mechanical lower leg support
- Designed for easy cleaning to aid infection control
- Trendelenburg as standard
- Compatible with environmental control system
- Comes with a 5-year warranty

HLBC791L	2115 x 1015mm	220 - 640mm	220kg/34 Stone

WOBURN COMMUNITY 1200

BEDS

9

BEDS

HLBC791.12 - WOBURN COMMUNITY 1200

The Woburn Community 1200 is Harvest's first wide profiling bed, built to the same high quality as other beds in the range. Although not a bariatric bed, it has a safe working load of 34 Stone.

The generous width allows patients to move freely. The lockable handset allows for quick adjustments of height, back rest and knee break and the attractive vinyl-clad head and foot boards facilitate infection control.

FEATURES

- Low voltage
- Lockable handset
- Max. patient weight 158kg/ 25 Stone
- SWL 193 kg / 30 Stone
- Optional wooden side rails
- Emergency battery backup
- Variable height (385 - 815mm)
- Also available in vinyl coated wooden head and foot boards
- Designed for easy cleaning to aid infection control
- Electric backrest and knee break with mechanical lower leg support
- Trendelenburg as standard
- In-built auto-regression
- Compatible with environmental control system
- Comes with a 5-year warranty

CODE	DIMENSIONS	HEIGHT	SWL
HLBC791.12	2120 x 1320mm	385 - 815mm	220kg/34 Stone

WOBURN ULTRA-LOW

HLB799.02 - WOBURN ULTRA-LOW

The Woburn Ultra-Low profiling bed is a unique system, which allows the platform to be lowered to as little as 67mm from ground level.

Intended for use without side rails, the service user can safely roll onto a crash mat, should they be inclined to roll whilst in bed.

Built with the Trendelenburg function as standard, service users are able to raise themselves to an almost stood or seated position, allowing more comfort whilst in bed.

The setting of height, backrest or knee break is simple, using the lockable handset.

FEATURES

- Low voltage
- Lockable handset
- Max. patient weight 175kg/ 27 Stone
- SWL 185 kg / 29 Stone
- Emergency battery backup
- Variable height (67 - 640mm)
- Wooden head and foot boards
- Electric backrest and knee break with mechanical lower leg support
- In-built auto-regression
- Trendelenburg as standard
- Easy Cleaning - complies to MHRA guidelines
- Compatible with environmental control system
- Comes with a 5-year warranty

CODE	DIMENSIONS	HEIGHT	SWL
HLB99.02	2130 x 900mm	67-640mm	185kg/29 Stone

WOBURN ULTIMATE

BEDS

11

BEDS

HLB798 - WOBURN ULTIMATE

The Woburn Ultimate Profiling Bed is our higher capacity bed within the Woburn range. Featuring triple aluminium side rails and under-bed strengthening, the Ultimate excels in patient support and ease of infection control.

Available in 1200mm and 1400mm wide, with a 60 stone weight capacity, this bed is able to support most bariatric patients. Comfort adjustments are made with ease due to the powerful lifting components and the high quality electronic control system.

FEATURES

- Lockable handset
- Aluminium side rails
- Max. patient weight 300kg/ 47 Stone
- SWL 380 kg / 60 Stone
- In-built auto-regression
- Emergency battery backup
- Variable height (275 - 690mm)
- Wooden head and foot boards
- Trendelenburg as standard
- Electric backrest and knee break with mechanical lower leg support
- In-built stability system
- Compatible with environmental control system
- Comes with a 5-year warranty

CODE	DIMENSIONS	HEIGHT	SWL
HLB798	2195 x 1340mm	275 - 690mm	381kg/60 Stone

ACCESSORIES

In-Built Extension

To remove the need for removable platforms, Harvest have introduced the In-Built Platform Extension. These add an additional 200mm to the Woburn beds, only when needed. The modern beds are now more adaptable for a wider range of residents.

Auto-Regression

Auto-Regression Back Rests provide patients with a more comfortable position. The mechanisms steadily raise or lower the patient whilst controlling posture - this reduces the 'push-down' effect on the body, keeping the resident more central in the bed and removes sheer and friction forces upon the body.

Trendelenburg Function

The Trendelenburg Function is available across the Woburn Bed Range.

This function enables the carer to raise the foot end of the profiling bed higher than the head end, beneficial for use with respiratory patients. Anti-Trendelenburg enables the head end to be elevated higher than the feet, improving posture, allowing patients to feel as though they are standing or are seated whilst in bed and can increase blood flow.

ACCESSORIES

Over-bed Reading Light

The Over-bed Light is compatible with the full Woburn bed range. It is safe and simply connects to the low voltage power supply of the bed. It comes complete with adjustable switch position and manoeuvrable head section.

The light provides a valuable touch of home comfort, providing convenient directed lighting.

Under-bed Light with Movement Sensor

The Under-Bed Light uses an energy efficient LED light, compatible with the full Woburn bed range.

It simply connects to the low voltage bed supply.

It is safe and maintains a low temperature.

The built-in sensor detects movement and illuminates underneath and around the bed, helping to prevent trips and falls.

Fall Mats

Harvest's high density, foam fall mats provide additional safety to those who are at a risk of rolling. Should users be in a Woburn Low or Woburn Ultra-Low Bed, without the use of side rails, the fall mat will provide a soft landing should they roll too far. Available in various sizes.

ACCESSORIES

Grab Handles

Harvest Healthcare's Grab Handles come in two sizes, one compatible with the standard Woburn Bed range, the other for use with the Ultimate bariatric bed. The Grab Handles assist the patient to sit up and get in and out of bed. They fit securely to the bed frame - no additional fixings required. They have a durable epoxy coating and can be used without removing the side rails.

Lifting Pole - Standard

The Standard Lifting Pole is compatible with all Woburn beds. The lifting pole drops securely into a socket provided in the bed frame. It assists the occupant to sit upright and get in and out of bed. It has a durable powder coated finish. The Lifting Pole is supplied complete with webbing strap and triangular handle.

Lifting Pole - Ultimate

The Ultimate 1200 Lifting Pole is made to be compatible with the Woburn Ultimate 1200 bed. It slots securely into sockets provided in the bed frame and has a durable powder coated finish. It assists the occupant to sit up in bed by holding onto the triangular handle.

ACCESSORIES

Bed Wall Spacer

The Bed Wall Spacer kit is designed to reduce the risk of the bed being placed too close to the wall and colliding with power sockets or other features. This reduces damage within the care environment.

Bumpers

A range of bumpers are available, the full range can be seen on our website, www.harvesthealthcare.co.uk.

HCS114 - Folding Side Rail Bumper

The Folding Bumper completely surrounds the bed rails and is fastened by a velcro strip across the bottom.

HCS18 - Anti-Entrapment Bumpers with Net Inserts

Designed to fit over each side rail with netting between. A link sheet forms a barrier between the user and the bed mechanism, decreasing the risk of entrapment. The link sheet is elasticated to enable profiling of the bed.

HCS112 - 2-Bar Bumper

A snug fitting zip on bumper, fits over the side rails with netting between to improve visibility. The bumper is covered in a cream or black PU coated waterproof and vapour permeable fabric.

ACCESSORIES

Vigilant System

Harvest Healthcare Ltd have worked extensively with our team of engineers around the world to develop this unique alert system.

The Vigilant system has been designed specifically for use on the Harvest Healthcare Ltd Woburn bed range but can be adapted to other bed makes. Designed with the safety of the patient as a first priority this system could help to reduce the likelihood of patient falls.

The kit does not require a pressure pad accessory as it monitors the user's movement via the sensor pin which is integrated into the bed, automatically activating when the user is absent from the bed. The system can be powered from the bed's power supply.

Key Features:

Versatile.

Simple to operate.

Compatible with most nurse-call systems.

Can run from Woburn bed's power supply.

Magnetic security key for the carer to prevent tampering.

All buttons on the handset act as a nurse-call for the patient.

2 second activation.

Has both normally closed and normally open outputs to nurse-call system.

Anti-microbial and anti-slip seat pressure sensor pad.

Onboard sounder that can be disarmed so that only the nurse-call system is activated.

Handset buttons emit a soft glow to allow the handset to be easily found in a darkened room.

ACCESSORIES

Bed Length Extension

The Bed Length Extension Platform, is available to extend your profiling bed by an additional 200mm. Some users are not comfortable in a typical 2000mm long Profiling Bed, which can cause entrapment issues.
