GUARDIAN

Wireless Falls Alarm System

Compatible with major nurse call systems!

Redefining Falls Alarm Systems

Less Wires Less Hassle

Harvest Healthcare are delighted to showcase our new, game changing falls alarm system, the **Guardian Wireless Alarm System**.

A streamlined wireless design that fits perfectly into any nurse call system, our Guardian is specifically made to address the limitations of traditional falls alarm systems.

INNOVATIVE IDEAS

The Guardian is an enabler. It has the potential to offer greater freedoms to both user and carer as well as providing safety and peace of mind.

The Guardian's transmitters feature a long battery life; no need to worry about constantly changing batteries!

The Guardian can be partnered with the **Universal Safe Roll**, forming a complete falls alarm package!

Intuitive, Refined and Effective

Compatibility

An important consideration when designing the Guardian was to take into account the vast variety of different environments and situations the system would be introduced into. For this reason, the Guardian will seamlessly integrate into any nurse call system; meaning you do not need to replace your existing system.

Compatible with major nurse call systems.

PIONEERING SAFETY

The Guardian was designed with safety at the forefront of mind and it aims to be as equally liberating as it is secure.

Ease of Use

Harvest Healthcare's Guardian falls alarm system seeks to simplify and streamline both the setup process and everyday operation. It is designed to be straightforward and intuitive, dramatically improving the everyday duties of your staff.

The system was created with ease of setup as a top priority; no more wasted time fumbling with wires and straining to wrap your head around complex manuals. The Guardian setup is a simple plug-and-go formula with both floor and seat mats having identical procedures. Simply connect, and the Guardian will take care of the rest.

Uncompromising Safety

Definitive Falls Alarm System

As the industry strives to promote and encourage independence and movement, the need for effective and safe alarm systems is rapidly increasing. The Guardian can reduce side rail use, provide sensors for communal areas such as lounges and help residents have freedom without compromising safety.

How to Buy

To order, or for more information on the Guardian Wireless Alarm System, please get in touch with our friendly and informative team or alternatively visit our website.

The Guardian's fundamental purpose is to act as a warning system to alert nurses and carers to unexpected and potentially dangerous movements from users. Triggered by a release or applied pressure to a surface, the Guardian can be configured to suit an extensive range of situations and requirements.

The Guardian system can be used to make a diverse range of scenarios much safer, providing a vital increase in response time in the event of a potential incident.
