Revitalising Care Spaces

Bath Replacement & Refurbishment Service

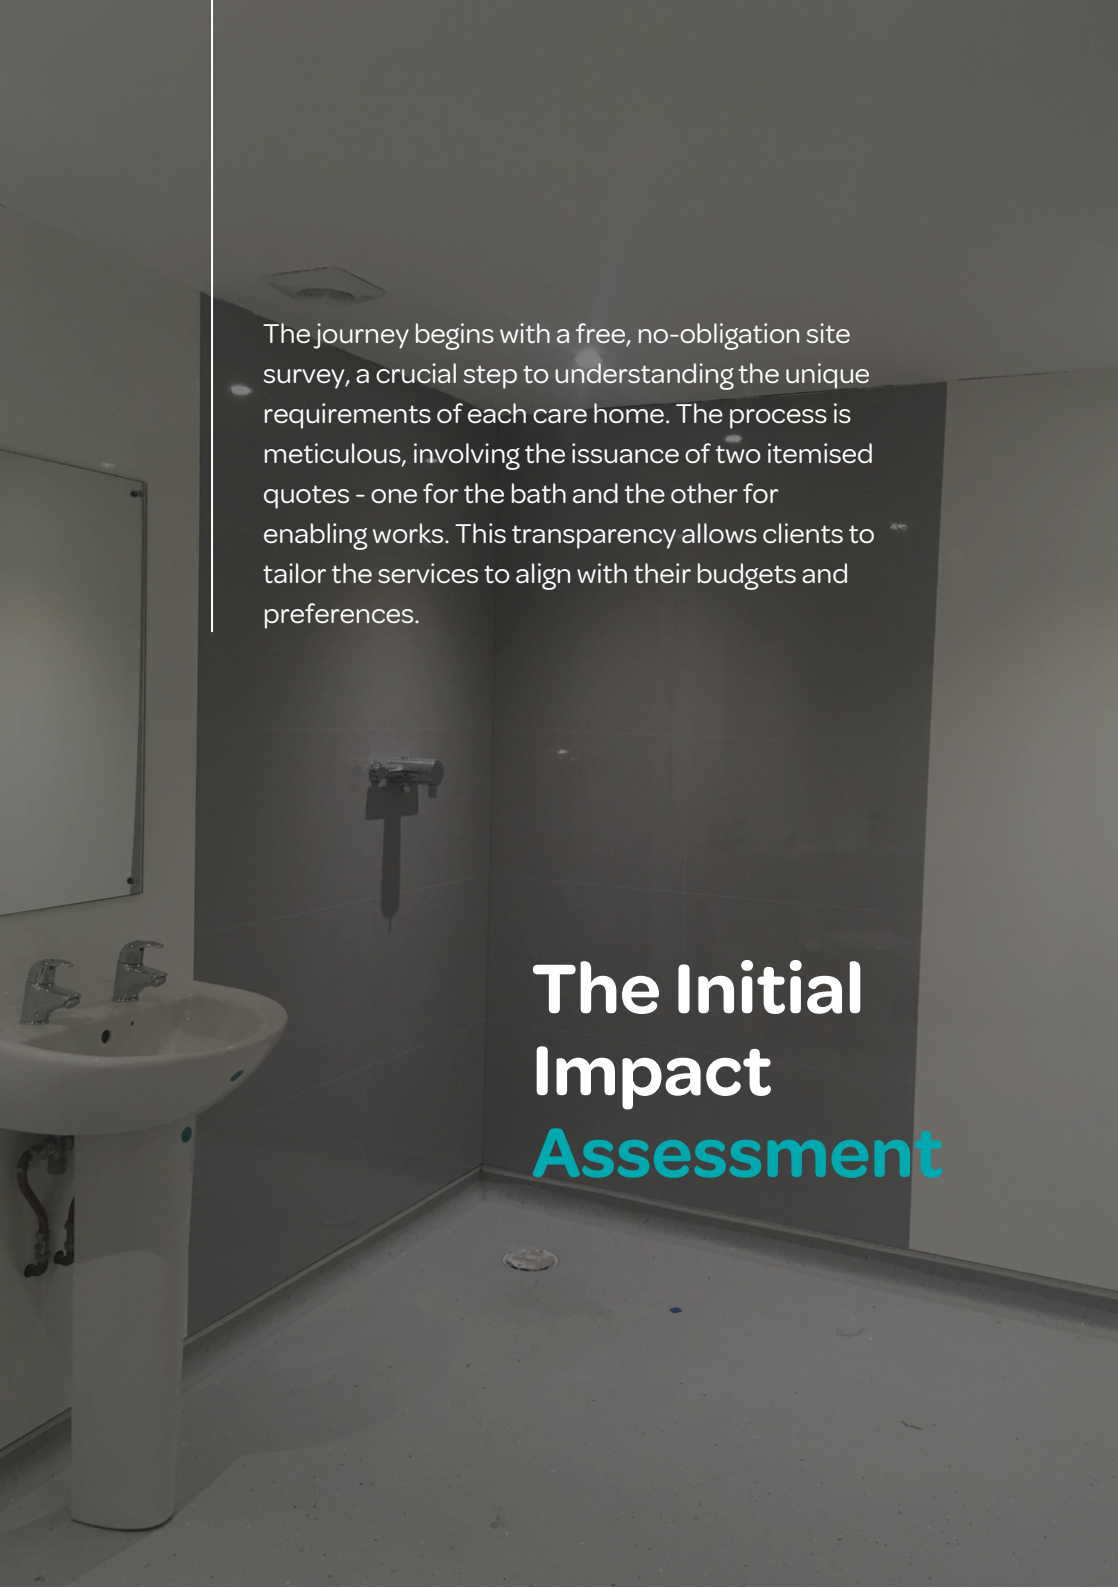

harvesthealthcare.co.uk

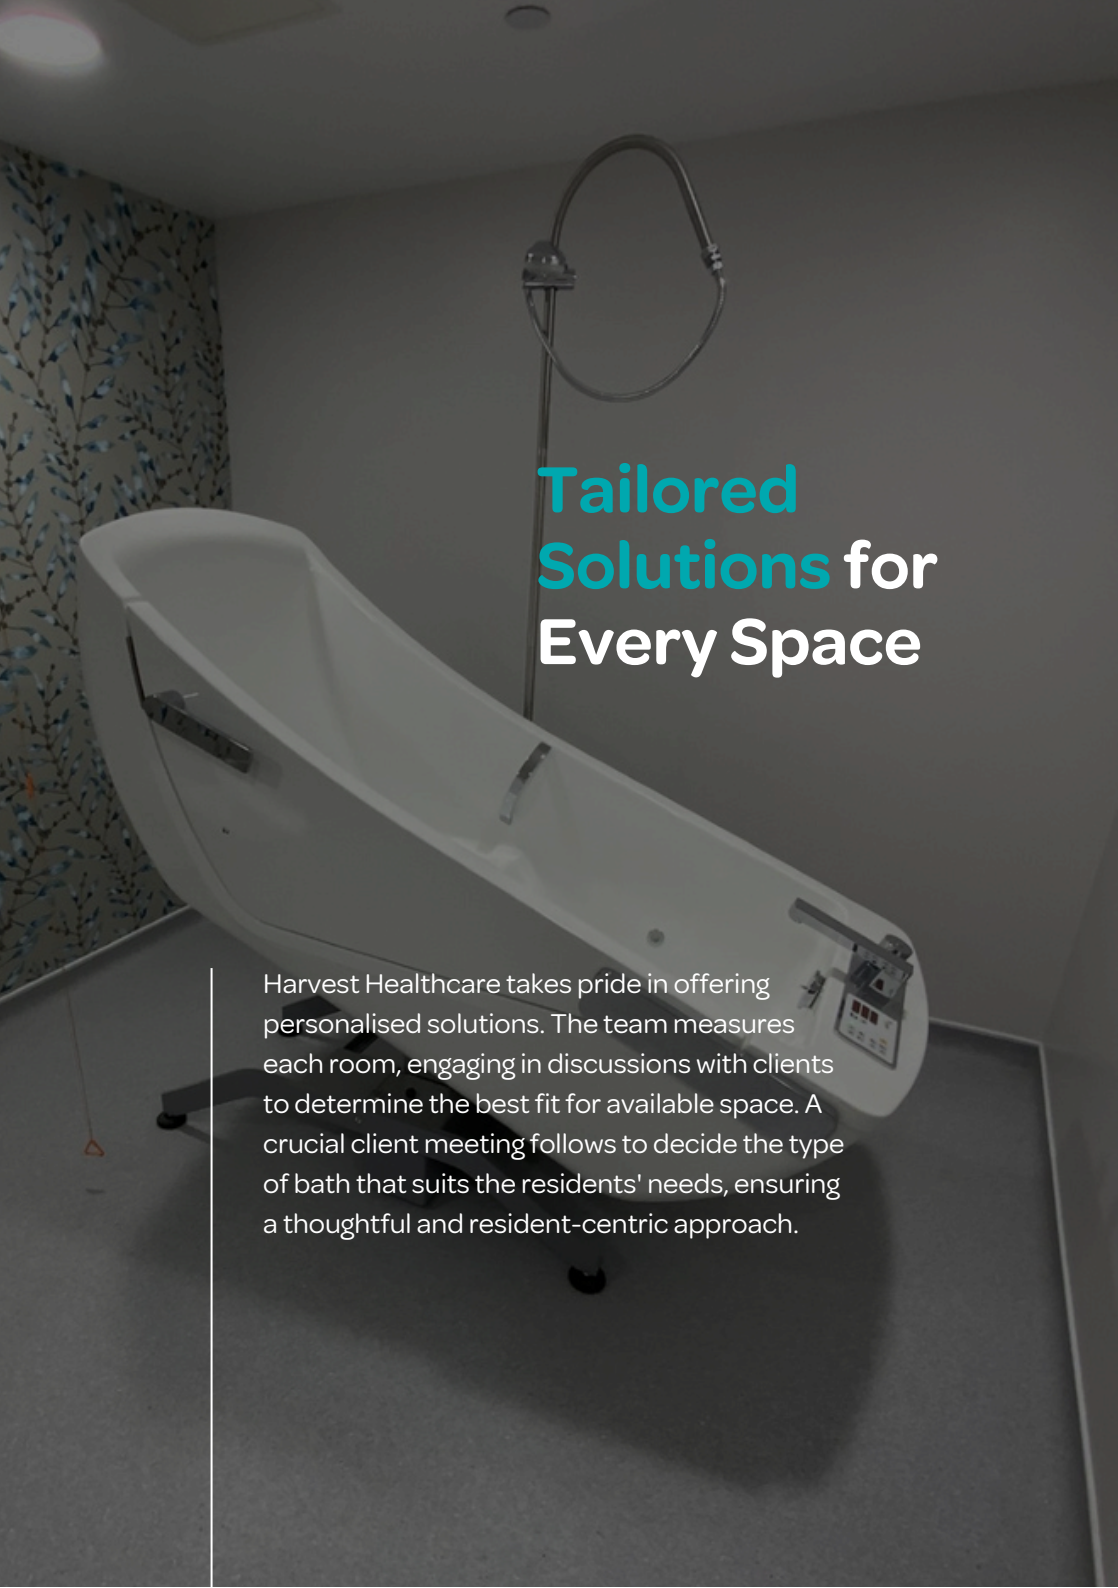

Transforming Environments, Enhancing Lives

In the ever-evolving landscape of care homes, Harvest Healthcare stands at the forefront with its innovative Bath Replacement and Refurbishment Service, a testament to the commitment to redefine care spaces for the better. Beyond just replacing baths, this service aims to create an environment that not only meets the practical needs of residents but also uplifts their overall well-being.

The journey begins with a free, no-obligation site survey, a crucial step to understanding the unique requirements of each care home. The process is meticulous, involving the issuance of two itemised quotes - one for the bath and the other for enabling works. This transparency allows clients to tailor the services to align with their budgets and preferences.

The Initial Impact Assessment

A white, adjustable medical bath is positioned in a room. The bath is on wheels and has a control panel on the right side. A shower head is mounted on a stand above the bath. The wall to the left has a patterned wallpaper. The text "Tailored Solutions for Every Space" is overlaid on the right side of the image.

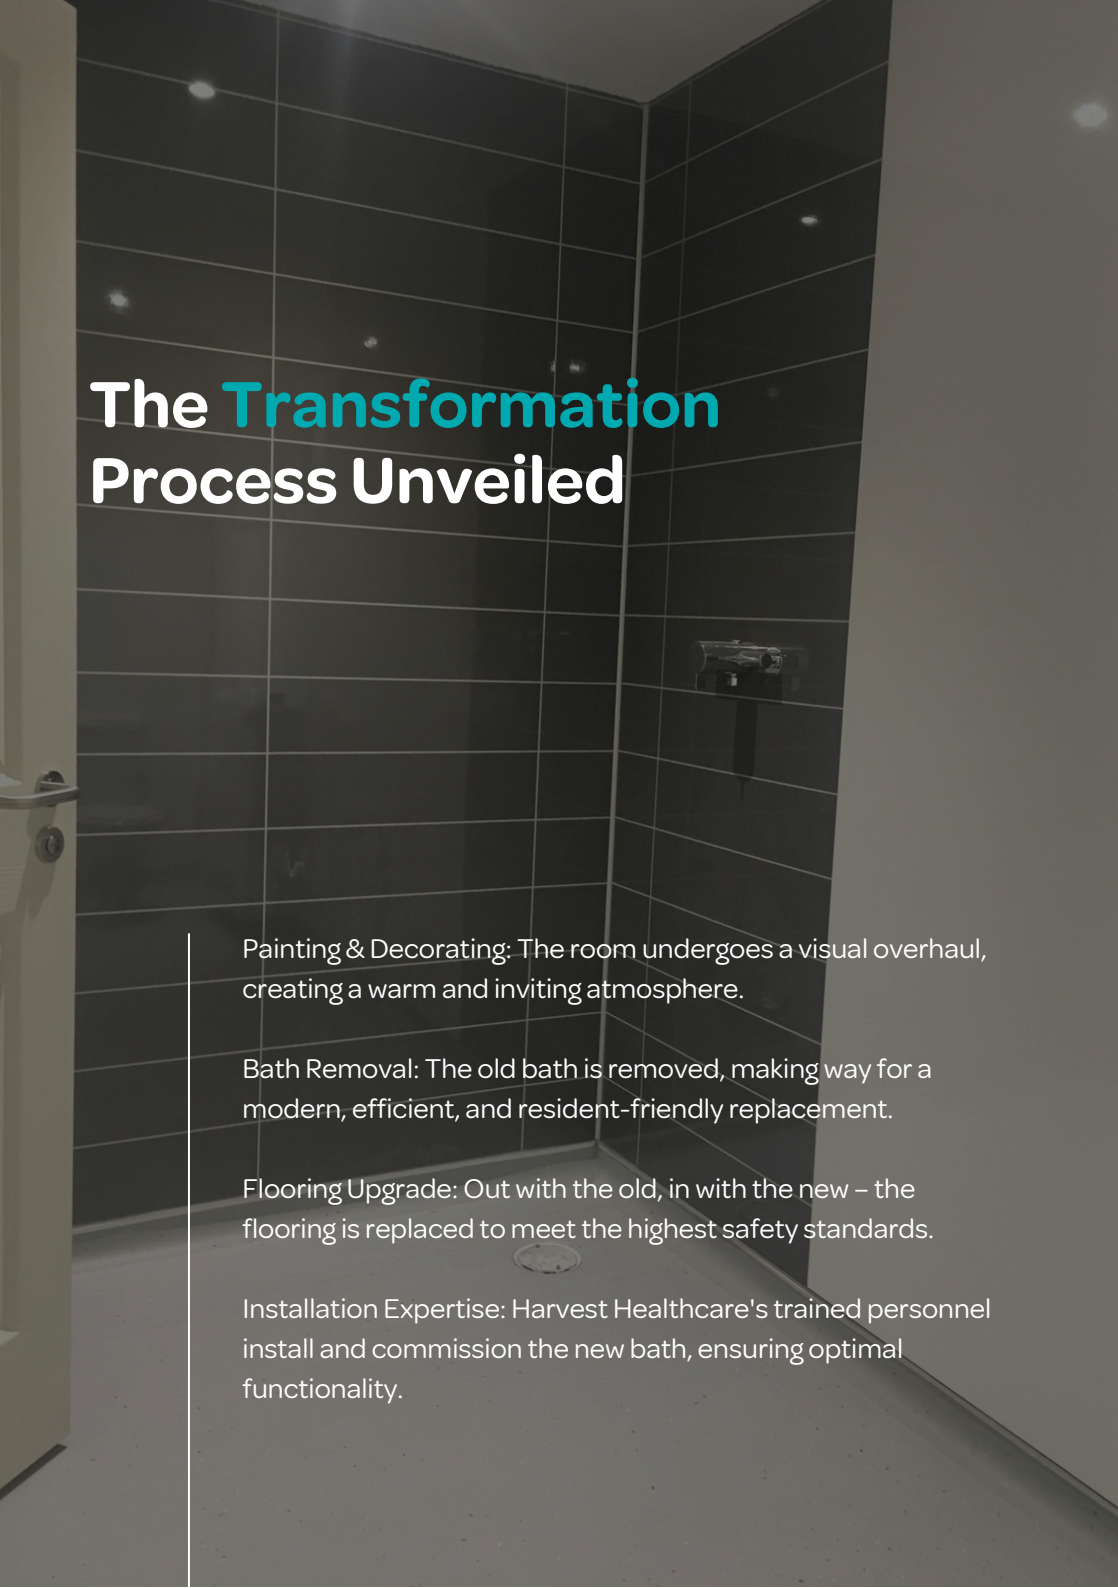

Tailored Solutions for Every Space

Harvest Healthcare takes pride in offering personalised solutions. The team measures each room, engaging in discussions with clients to determine the best fit for available space. A crucial client meeting follows to decide the type of bath that suits the residents' needs, ensuring a thoughtful and resident-centric approach.

The service offers flexibility with two refurbishment options – semi and full. Semi-refurbishment involves upgrading the essentials, such as flooring and electrical supply, while full refurbishment extends to painting, decorating, wall boarding, and additional fixtures tailored to the client's needs.

From Semi to Full Refurbishment

A photograph of a modern bathroom interior. The walls are covered in large, dark grey rectangular tiles with light grey grout. A white door is visible on the left side of the frame. The floor is a light-colored, smooth material. The lighting is soft and even.

The Transformation Process Unveiled

Painting & Decorating: The room undergoes a visual overhaul, creating a warm and inviting atmosphere.

Bath Removal: The old bath is removed, making way for a modern, efficient, and resident-friendly replacement.

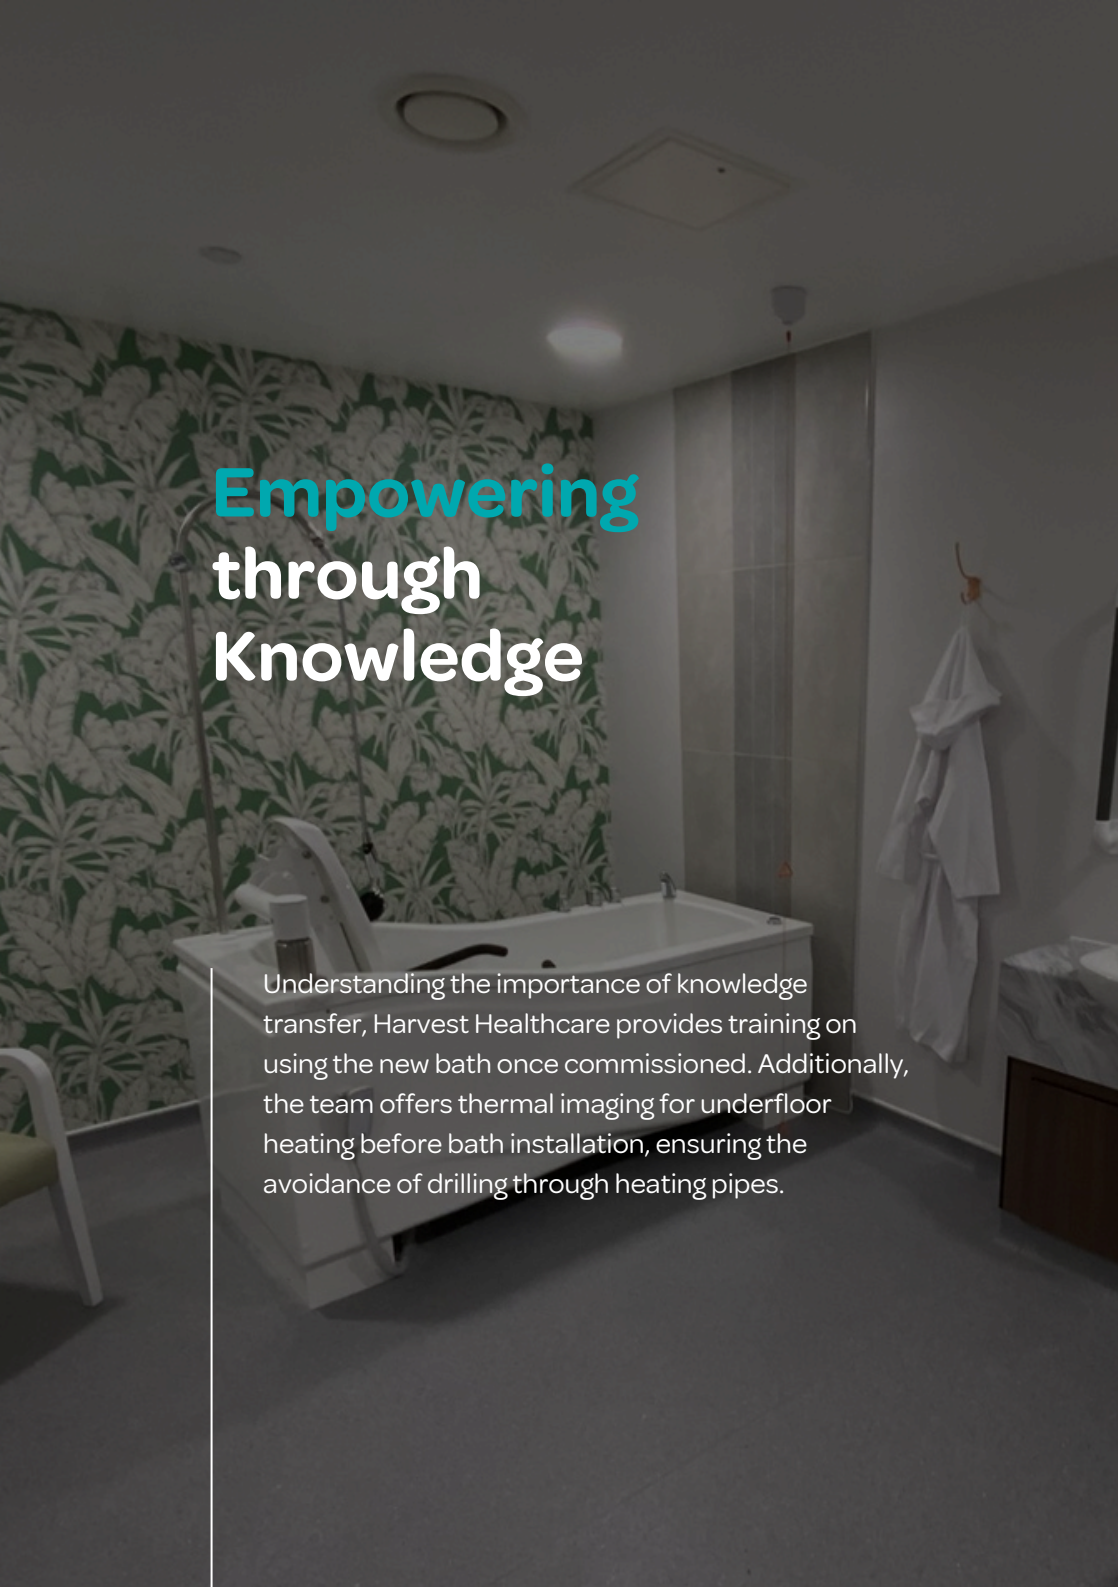

Flooring Upgrade: Out with the old, in with the new – the flooring is replaced to meet the highest safety standards.

Installation Expertise: Harvest Healthcare's trained personnel install and commission the new bath, ensuring optimal functionality.

A photograph of a modern bathroom. On the left is a white toilet. To the right is a shower area with dark grey or black square tiles on the walls. A shower head and a handheld shower wand are visible. The floor is a light grey speckled material. The lighting is soft and even.

Harvest Healthcare is committed to sustainability. The disposal of old baths is carried out under license, with all waste removed from the site once the refurbishment is complete. The process is swift, with an average of one working week for semi-refurbishment and two weeks for a full refurbishment.

Ensuring
Sustainability
and Comfort

Empowering through Knowledge

Understanding the importance of knowledge transfer, Harvest Healthcare provides training on using the new bath once commissioned. Additionally, the team offers thermal imaging for underfloor heating before bath installation, ensuring the avoidance of drilling through heating pipes.

Harvest Healthcare's Bath Replacement and Refurbishment Service goes beyond the conventional, creating spaces that prioritise the dignity, safety, and comfort of residents. It's a transformative journey that echoes Harvest Healthcare's commitment to redefining the standards of care environments for the well-being of all.
