NEW!

DESIGNED AND DELIVERED IN 3D

These new products have been designed and manufactured in-house, using our 3D printer. This new technological innovation allows us to design and develop exciting, bespoke parts and accessories. We are continually expanding our 3D product range to deliver convenient solutions and accessories for the modern care environment.

Please get in touch for any bespoke 3D printed solutions. Please see overleaf for contact information.

Bed Accessories Guide

How to use your 3D printed products.

HANDSET HOLDER

Simply remove the plastic cover from the frame of the bed and replace it with your handset holder by pushing firmly until secure. The Holder can be placed in any four corners of the bed frame allowing it to be wherever is most convenient for you. Compatible with the full Community range.

REUSABLE CABLE RETAINER

To set it up all you have to do is twist the end of the retainer until unlocked then place the loose wires and cables inside then simply twist it back into place. Attach the cable tie onto a static section of the frame on the bottom of the bed and then you are done. Excellent for keeping areas under the bed tidy and secure.

PUMP GRIPS

Simply place your Harvest pump on your bed footboard and push the hangers closer together until the pump is secured to the bed. Then place the ends of the hangers into either side of the holes in the grips and adjust accordingly until secure. This will ensure that your pump is safely secured on your bed.
