POWER TO DELIVER

HARVEST HEALTHCARE YOUR FIRST CHOICE...

WHO WE ARE & WHAT WE DO

Harvest Healthcare has more than 20 years experience in the design, manufacture and service of pressure care equipment, beds, moving, handling and showering aids.

We offer a variety of support services from mattress repair and decontamination, service and repair provision and client assessment through to project management for installed solutions.

Since 2019 we have been proud to be part of the Prism Healthcare Group, which has enabled us to invest significantly in R&D, expand facilities, and serve our customers even better. Prism Healthcare has an unrivalled range of products and services across all healthcare sectors - see pages 54 for further details of the Group, its brands and subsidiaries.

prism healthcare

YOUR CARE SOLUTIONS PARTNER

Our purpose is to be a true partner in care.

We're passionate about offering the care sector high-quality, trusted solutions – from innovative pressure care and profiling beds, to expert servicing, maintenance and other value-added services. Everything we provide is a commitment to the comfort and dignity of every resident, giving our partners the value and peace of mind they deserve. Together, we transform lives.

TOTAL SUPPORT TEAM

We offer a full package to support you from your initial inquiry, delivery, installation and full aftersales support including service and maintenance.

HARVEST FAST TRACK NATIONWIDE DELIVERY

We use our own transport for many deliveries which gives us the flexibility to meet your needs.

SUPERIOR BUILD QUALITY AND COMPLIANCE

Our products are designed to provide longevity and reliability in healthcare settings by using durable materials, quality fabrication, and adherence to relevant standards and regulations.

KNOWLEDGEABLE SALES TEAM

Our experienced sales team is always available to help you find the best possible solution.

INNOVATIVE WELL DESIGNED PRODUCTS

Our products are designed to meet the ever-changing needs of our customers, by providing solutions for clinical and operational requirements through close collaboration with users.

EXCEPTIONAL VALUE FOR MONEY

Through careful design and production processes, you can be assured that our products will provide value for money throughout their working life.

EXTENSIVE PRODUCT RANGES

To give you the best solution we maintain an extensive range of products for complete flexibility.

1. BEDS

Harvest Healthcare provide a wide range of profiling beds designed to provide support to a variety of service users. The exclusive range of Woburn beds, along with the Cadence range, provides solutions to ensure customers can meet clinical, functional and operational requirements. The profiling platform has an adjustable knee break, head section, and the entire bed frame is height adjustable. Safety and durability are key aspects of our design ethos – each bed has something different to offer.

In this section, you will find:

Woburn Community Profiling Beds (Community, Community Low, Community 1200)

Woburn Profiling Beds (Woburn, Woburn Low)

Woburn Profiling Floor Beds (Ultra Low and Ultra Low 800)

Woburn Ultimate Profiling Beds (Ultimate 1200, Ultimate 1400)

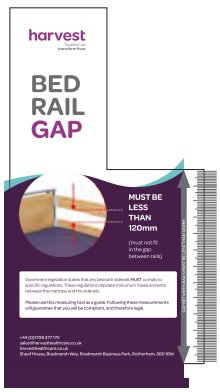

Woburn Bed Accessories

Bumpers

We offer simple to use bedrail height measurement tools so that you can quickly and easily check if you are compliant with Siderail Regulations 60601/2/52.

If you would like to be sent copies of the rail height measuring guide (Product Code: RAILGUIDE), please get in touch.

WOBURN COMMUNITY PROFILING BEDS

harvest

Harvest Healthcare Woburn Community Profiling beds are designed to fit within the community markets. These versatile beds are intended to enhance comfort, safety, and functionality, making them invaluable for individuals with diverse needs.

In a community setting, the Woburn Community Profiling beds provide essential support for elderly or disabled individuals, facilitating easier mobility, reducing the risk of pressure ulcers, and assisting caregivers in delivering proper care. The beds have integrated safety features like siderails and braking systems, ensuring patient safety and reducing the risk of falls.

All the Woburn beds are built to comply with Siderail Regulations. This allows rails to be used on beds without compromising safety for the user. Identifying the needs of the service user before choosing a bed is of great importance. Harvest Healthcare have a knowledgeable team able to provide you with enough information to make such a decision.

The beds are easy to clean and comply with MHRA guidelines.

WOBURN COMMUNITY BED

harvest

The Woburn Community Bed has been designed for service users and carers in a home care environment. The range of options and accessories means it meets clinical requirements for a wide range of service users, helps maintain their independence and supports carers by reducing moving and handling risks. Lightweight and delivered on transport stands in 4 sections, it's easy to clean, assemble by a single operator, and recycle to ensure product longevity.

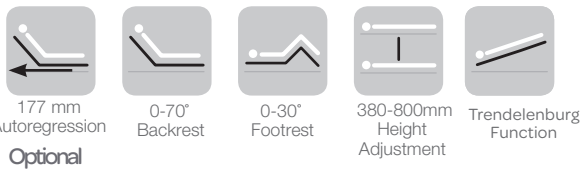

KEY FEATURES & BENEFITS

- Low voltage power supply (no mains voltage on the bed chassis to reduce the risk of electric shock)
- Electric backrest and knee break with mechanical lower leg support, all operated through the handset
- Locking handset
- Integral 115 mm siderails (will take up to 8 inch mattress) (optional)
- Inbuilt emergency battery backup
- Extendable by 200mm
- Autoregression (optional)
- Quick release actuators
- Trendelenburg as standard
- Replaceable PCB & actuator pistons
- Compatible with environmental control system
- Easy to install
- Padded headboards & other wood finish options are available on request

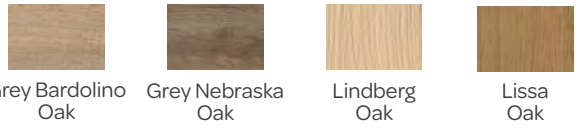

7 year warranty

WOBURN COMMUNITY LOW BED

harvest

The Woburn Community Low Bed has the same features, options and accessories as the Woburn Community bed but with a lower platform height, making it suitable for service users who need a lower ingress and egress height. This provides increased safety and independence and reduces the risk of falls. Lightweight and delivered on a transport stand in 4 sections, it's easy to clean, assemble by a single operator, and recycle to ensure product longevity.

KEY FEATURES & BENEFITS

- Low voltage power supply (no mains voltage on the bed chassis to reduce the risk of electric shock)
- Electric backrest and knee break with mechanical lower leg support, all operated through the handset
- Locking handset
- Integral 115 mm siderails (will take up to 8 inch mattress) (optional)

WOBURN COMMUNITY 1200 BED

harvest

The Woburn Community 1200 is Harvest's first wide profiling bed, built to the same high quality as the rest of the Woburn range. It shares the same wide range of options and accessories as the Woburn Community and Community Low beds. Designed for individuals who would normally be cared for on a standard bed but require additional width, either for comfort or to assist with their care. It helps maintain independence and supports carers by reducing moving and handling risks.

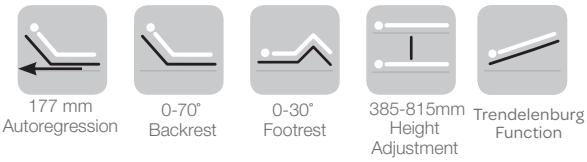

KEY FEATURES & BENEFITS

- Low voltage power supply (no mains voltage on the bed chassis to reduce the risk of electric shock)
- Electric backrest and knee break with mechanical lower leg support, all operated through the handset
- Locking handset
- Integral 115 mm siderails (will take up to 8 inch mattress) (Included)
- Inbuilt emergency battery backup
- In-built autoregression
- Trendelenburg as standard
- Quick release actuators
- Replaceable PCB & actuator pistons
- Compatible with environmental control system
- Easy to install
- Also available in vinyl coated wooden head and footboards
- Padded headboards & other wood finish options are available on request

WOBURN
PROFILING BEDS

harvest

Harvest Healthcare Woburn Profiling beds are designed to fit within the long-term care markets. The beds significantly improve the quality of care and comfort for long-term care patients while supporting caregivers in delivering effective, safe, and efficient care.

The Woburn Profiling beds allow for easy adjustment of the bed's height, backrest, and leg sections, enabling personalised positioning that minimises the risk of pressure ulcers and promotes circulation. The ability to change positions also aids in respiratory and digestive functions. The beds have integrated safety features like siderails and braking systems, ensuring patient safety and reducing the risk of falls. For caregivers, these beds make patient care more manageable by enabling easier transfers, reducing strain on caregivers during repositioning, and facilitating daily care tasks. The beds are easy to clean and comply with MHRA guidelines.

A nationwide team of engineers are on hand to install, provide training and service profiling beds. At Harvest Healthcare, we provide a cost-effective, quality service with an honest approach – preferring to repair rather than replace wherever possible.

Our compliance checks ensure all equipment serviced by Harvest Healthcare is reliable and efficient, enabling staff to fully carry out their role effectively. Health and safety of service users and staff is important to us, so with ongoing support through regular training sessions and equipment audits, we will ensure that the quality of patient care increases and professional standards are maintained.

WOBURN BED

harvest

The Woburn Profiling Bed is a reliable bed with quality features that provides outstanding comfort and ease of care for the user and carer. The robust wooden siderails are collapsible below mattress level and extend higher to allow a safe mattress depth of 205mm, giving scope for improved pressure relief and comfort. The bed raises to 795mm, providing a better working height for nursing staff. Adjustment of back rest, knee break and platform height is all at the touch of a button.

KEY FEATURES & BENEFITS

- Low voltage power supply (no mains voltage on the bed chassis to reduce the risk of electric shock)
- Electric backrest and knee break with mechanical lower leg support, all operated through the handset
- Locking handset
- Integral 115 mm siderails (will take up to 8 inch mattress) (Included)
- Inbuilt emergency battery backup
- Autoregression (optional)
- Trendelenburg (optional)
- Wraparound wooden head and footboards
- Quick release actuators
- Replaceable PCB & actuator pistons
- Compatible with environmental control system
- Easy to install

WOBURN LOW BED

harvest

The Woburn Low is a dependable, four-section profiling bed designed with a high-quality control system and high load capacity. It lowers to a platform height of 220mm, which significantly reduces the risk of injury for patients likely to roll out of bed. It features electric backrest and knee break functions, and mechanical lower leg support, all operated via a lockable handset. With optional auto regression and Trendelenburg functions, this bed is ideal for many environments within the care sector.

KEY FEATURES & BENEFITS

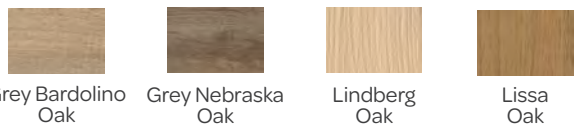

- Low voltage power supply (no mains voltage on the bed chassis to reduce the risk of electric shock)
- Electric backrest and knee break with mechanical lower leg support, all operated through the handset
- Locking handset
- Integral 115 mm siderails (will take up to 8 inch mattress) (optional)
- Inbuilt emergency battery backup
- Autoregression (optional)
- Trendelenburg (optional)
- Wraparound wooden head and footboards
- Quick release actuators

WOBURN ULTRA LOW BED

harvest

The Woburn Ultra Low profiling bed lowers to 67mm, ideal for users at high risk of falls and designed for use without siderails (optional). It features full four-section profiling with auto regression, a range of accessories for vulnerable users, and supports carers in safe moving and handling. A lockable and removable handset enhances user safety, while on-bed labels with part and QR codes link to manuals and specifications for easy maintenance.

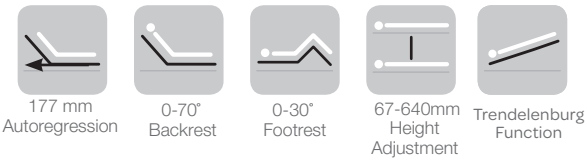

KEY FEATURES & BENEFITS

- Low voltage power supply (no mains voltage on the bed chassis to reduce the risk of electric shock)
- Electric backrest and knee break with mechanical lower leg support, all operated through the handset
- Locking handset
- In-built emergency battery backup
- In-built autoregression

WOBURN ULTRA LOW 800 BED

harvest

The Woburn Ultra Low 800 profiling bed provides an ultra-low height of 90mm and a high platform height of 800mm. This meets the needs of service users at increased risk of falls, while also reducing moving and handling risks for carers who need a higher working height. A full four-section profiling bed with auto regression as standard, it's intended for use without siderails but has an option for full-length mesh siderails if required. The handset can be locked or removed from reach.

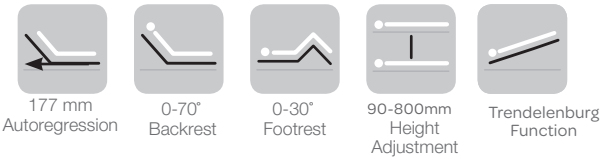

KEY FEATURES & BENEFITS

WOBURN ULTIMATE PROFILING BEDS

harvest

Harvest Healthcare Woburn Ultimate Profiling beds are designed to fit for the plus size residents and service users. At Harvest Healthcare we aim to relieve the stress of sourcing and fitting plus sized equipment, leaving you to focus on providing the best quality care and support.

Our plus size range includes beds, mattresses, hoists and bathroom equipment, all designed to make life easier for residents and for their carers and give everyone access to the love and support they deserve.

Our knowledgeable customer services and sales teams can talk you through any tricky situations. Our sister company Prism Medical can also support with ceiling track hoists, an excellent way to make use of smaller spaces.

BED FEATURES

harvest

IN-BUILT EXTENSION

To remove the need for removable platforms, Harvest has introduced the In-Built Platform Extension.
These add an additional 200mm to the Woburn Community beds only when needed. The modern beds are now more adaptable for a wider range of residents.

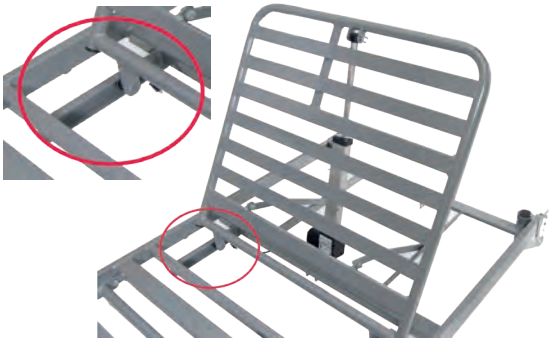

AUTOREGRESSION

The Autoregression backrest function on our Woburn beds increases the mattress platform length in line with the natural movement of the body whilst in a seated position, providing a more comfortable experience for users.
The mechanisms steadily raise or lower the patient- this reduces the 'push-down' effect on the body, keeping the resident more central in the bed and reducing shear and friction forces upon the body.

HOW CAN AUTOREGRESSION HELP PREVENT PRESSURE INJURY?

A standard backrest pushes the user down the bed as it raises, creating shear forces and increasing the risk of tissue damage.
Autoregression backrests move slowly backwards at the sacral area as they raise. This allows the bed to move fully around the user, rather than the user being moved to accommodate the bed.
This means that the sacral area and heels do not move at all as the bed profiles. This removes the risk of shear and friction, protecting against tissue damage, prevents the need for repositioning and maintains user comfort.

TRENDELENBURG FUNCTION

The Trendelenburg Function is available across the Woburn Bed Range. This function enables the carer to raise the foot end of the profiling bed higher than the head end, beneficial for use with respiratory patients. Anti-Trendelenburg enables the head end to be elevated higher than the feet, and can be used with other functions, backrest and knee break, to improve user positioning and also relieve pressure points. Guidance on the use of trendelenburg and reverse trendelenburg should be sought from a healthcare professional for individual service users. This function can be locked out independently.

Trendelenburg Handset

harvest

GRAB HANDLE FOR WOBURN BED

The Grab Handles assist the patient to sit up and get in and out of bed. They fit securely to the bed frame - no additional fixings required. They have a durable epoxy coating and can be used without removing the siderails. They are available to be used with Woburn, Woburn Ultimate and Woburn Ultra-Low beds.

OVER-BED READING LIGHT

The Over-Bed Light is compatible with the full Woburn bed range. It is safe and simply connects to the low voltage power supply of the bed. It comes complete with an adjustable switch position and manoeuvrable head section.
The light provides a valuable touch of home comfort, providing convenient directed lighting.

Product Information

Product Code	Description
HLDW099	Overbed Light

UNDER-BED LIGHT WITH MOVEMENT SENSOR

The Under-Bed Light uses an energy efficient LED light, compatible with the full Woburn bed range. It simply connects to the low voltage bed supply. It is safe and maintains a low temperature. The built-in sensor detects movement when the user leaves the bed and illuminates underneath and around the bed, helping to prevent trips and falls.

HLDWC123	Siderail and Mattress Platform Length Extension Kit 115mm Height
HLDU123.12	Ultimate 1200 Bed Length Extension Kit (Base and Rail Extension Pieces)

MESH SIDERAILS FOR WOBURN ULTRA LOW AND ULTRA LOW 800

The Mesh Siderail System is intended to be used to provide security to the occupant of the bed whilst the bed is raised to a correct height for giving care. This is to reduce the risk of a fall from the bed or potential entrapment from a siderail system.

Product Information

Product Code	Description
HLDWUL110	Full Length Mesh Siderails for Woburn Ultra Low Bed (Pair)
HLDWUL8110	Full Length Mesh Siderails for Woburn Ultra Low 800 Bed (Single)

MATTRESS LENGTH EXTENSION

The Static Mattress Length Extensions have been designed for use with our Static Mattress range.
Ideal for use with existing mattresses, the piece will add a further 200mm to the length of the mattress and close any gaps between the mattress and bed frame. It is available in both 900mm and 1200mm widths and includes the option of Hook and Loop Strap to attach to the bed frame to keep it in place when the bed is operated. It can be used at the head end of the bed too.

THE DOUBLE & NON-TILTING OVER BED TABLE

harvest

The Double & Non-Tilting Overbed Table Range delivers versatile, user-focused support for healthcare and home use.

Double Tilting: split top with a fixed section for essentials and a larger panel that tilts both ways for reading, writing, or tablets/laptops. **Non-Tilting:** rigid, flat surface ideal for dining, personal items, or clinical tasks needing maximum stability.

Both offer one-hand, stepless height adjustment 760–1000 mm, a sturdy slim build, and a U-shaped chassis for space-saving storage behind beds or furniture. A robust metal rail prevents items falling. Durable, powder-coated metalwork and easy-clean design support high hygiene.

KEY FEATURES & BENEFITS

- One-hand operation: Easy, single-handed adjustments.
- Stepless height adjustment: 760–1000 mm.
- High load capacity: Up to 15 kg.
- Secure mobility: 4 × 75 mm castors, each individually lockable.
- Integrated safety rail: Helps prevent items sliding off.
- Space-saving U-shaped chassis: Stores neatly behind furniture.
- Easy to clean: Wipeable surfaces support high hygiene.
- Durable build: Powder-coated metalwork (RAL 9006) for long-lasting, clean finish

PIVOTPRO BEDSIDE TABLE

harvest

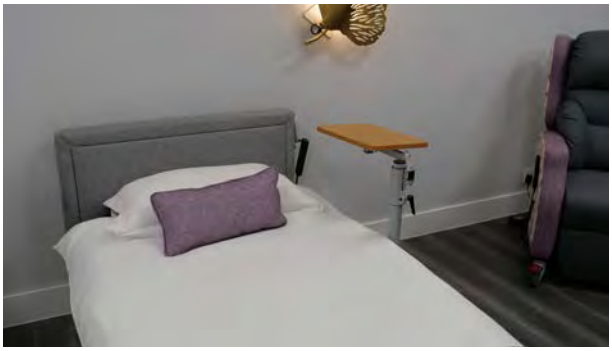

The PivotPro Bedside Table is engineered to address challenges associated with floor beds and bedside tables; traditional bedside tables become impractical when the bed is lowered, and standard overbed tables cannot be used either when the bed is lowered due to clearance under the bed. The Harvest PivotPro introduces a smart pivot design that securely clamps to the bed frame, overcoming these challenges.

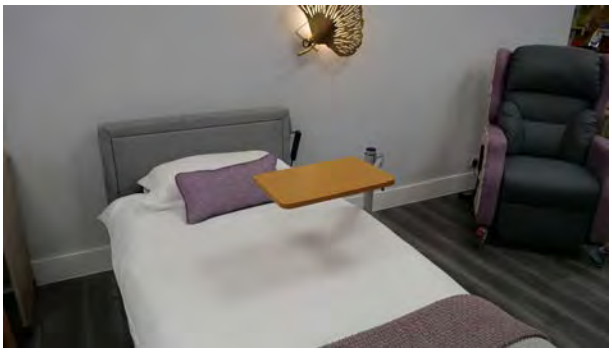

This innovative table can be effortlessly pivoted to the side of the bed, transforming into a functional bedside table for lightweight personal items such as remote controls, eyewear, and books. Alternatively, it can be pivoted in front of the person in bed to provide a convenient surface for holding food, drinks, and personal effects.

The PivotPro is compatible with other Woburn beds, excluding the Woburn Ultimate. Equipped with removable spacers, it accommodates beds with larger platform tubes, expanding its usage beyond the Woburn range.

KEY FEATURES & BENEFITS

- Dual-Purpose Functionality: Seamlessly transitions to the side for personal effects or in front for meals and beverages.
- Adaptable Design: Removable spacers ensure a secure fit on a wide range of beds.
- The table surface moves with the platform, so it is always accessible, no matter the height of the bed.

THE COSY™ HEAD & FOOTBOARD COVER

harvest

The Cosy™ headboard and footboard cover is designed specifically to enhance the appearance and aesthetic appeal of our wooden Woburn profiling beds, giving them an upgraded, upholstered look. This product transforms the bed's visual impact, making it ideal for both home and care environments. The Cosy™ provides a sophisticated, soft, and cosy feel that seamlessly integrates with various bedroom decors, offering both visual comfort and protection.

The Cosy™ also offers an additional layer of protection to the wooden structure, shielding it from scratches, wear, and tear, thus extending the life of the bed. Made with fire-retardant, stain-resistant, anti-bacterial, waterproof fabric suitable for the healthcare environment, the cover is easy to clean and maintain, ensuring a hygienic and fresh appearance over time.

KEY FEATURES & BENEFITS

- Upgrade aesthetic appeal
- Provide a cosy ambience
- Protect bed frame
- Facilitate easy maintenance

STANDARD BUMPER
ANTI-ENTRAPMENT BUMPER

harvest

STANDARD BUMPER WITH NET/MESH INSERT

The Standard Bumper with net/mesh inserts is designed to fit over siderails, providing safe protection for users in bed. The net/mesh inserts are incorporated with the bumpers, to improve visibility between each siderail, reducing the feeling of entrapment. The bumper fits all Woburn beds. All the bumpers come with covers that are removable and machine washable, for better infection control.

Product Information

Product Code	Description
HCSBUMP112	Standard Bumper with Net/Mesh Inserts for Woburn, Community & 1200 Bed (L: 2000 mm)
HCSBUMP212	Extended Bumper with net/mesh inserts for Woburn, Community & 1200 Bed (L: 2200 mm)
HCSBUMP130	Standard Bumper with Net/Mesh Inserts for Woburn Ultimate Bed (L: 2000 mm)

ANTI-ENTRAPMENT BUMPER WITH NET/MESH INSERT

The Anti-Entrapment Bumper is a 2 bar bumper with net/mesh insert and anti-entrapment system with link sheet. Designed for users who move excessively in bed, to prevent limbs from becoming trapped. The Anti-Entrapment Bumper fits all standard width Woburn beds, whilst also being suitable for most other manufacturer's beds with two full length wooden siderails at each side of the bed. We also offer the Anti-Entrapment Bumper for beds with 3 bar siderails (Ultimate/Safeguard).

All the bumpers come with covers that are removable and machine washable, for better infection control.

WRAPOVER BUMPER
STANDARD AND HEIGHT EXTENSION

harvest

WRAPOVER BUMPER

The Wrapover Bumper is used to surround the bed siderails, providing a safe and cushioned barrier for patients. Designed with users in mind who are inclined to roll whilst in bed, meaning extra protection may be necessary. The three quarter length bumper wraps over the siderails and secures with Hook and Loop at the bottom, ensuring ease of use. All the bumpers come with covers that are removable and machine washable, for better infection control.

WRAPOVER BUMPER STANDARD & HEIGHT EXTENSION (200MM)

The 200mm height extension suitable for the Wrapover Bumper is used to surround the bed siderails, providing a safe and cushioned barrier for patients. Designed for use when the height attachment siderails are placed onto the bed, ensuring full protection for the user.

WRAPOVER BUMPER STANDARD & LENGTH EXTENSION (500MM)

The 500mm length extension suitable for the Wrapover Bumper is used to surround the bed siderails, providing a safe and cushioned barrier for patients. Designed for use when the bed has been extended, ensuring full protection for the user.

UNIVERSAL SAFE ROLL BUMPER

harvest

UNIVERSAL SAFE ROLL

The Universal Safe Roll system is a state-of-the-art crash mat, designed to dramatically change the landscape of falls protection and support the reduction of the use of siderails. Traditional static floor mats are often a trip hazard, have to be moved to accommodate moving and handling equipment, and are frequently too thin to provide true protection from falls. This radical new design eliminates all these issues, providing safety for the resident and exceptional ease of use for carers. It also protects the user from the metal mattress platform.

The folding mat attaches to the side of the bed, and Hook and Loop up when the bed is raised for care (image 1), enabling access for carers and for equipment. As the bed is lowered the deep foam mat folds out to lie alongside the bed, as a true safety feature (image 2). Designed to fit our Woburn Ultra Low, Low and standard beds, the Universal Safe Roll is suitable for a wide range of users and is ideal for use within nursing homes and the domestic environment.

All the bumpers come with covers that are removable and machine washable, for better infection control.

SNUG WALL BUMPER / BED SIDE PLATFORM BUMPER / SAFETY WEDGES

harvest

SNUG WALL BUMPER

The Snug Wall Bumper has been designed to fit onto our **Woburn bed range** or similar types of profiling beds produced by other manufacturers. Beds often need to be placed slightly away from the wall due to room fittings and fixtures, which can leave a gap. This can be an entrapment risk, and the Snug Bumper unobtrusively and comfortably fills this space. This removes the entrapment risk without the need for siderails to be fitted. The easy to fit bumper helps to prevent accidental contact with the wall and is created using soft to the touch material and spacer mesh to prevent the risk of suffocation and increase patient safety. All the bumpers come with covers that are removable and machine washable, for better infection control.

Please scan the QR code to be directed to the product webpage, where you can watch the video on 'How to Install the Snug Wall' under the 'Video' tab.

2. MATTRESSES AND CUSHIONS

Harvest Healthcare have a wide range of active and static mattresses and cushions, designed with comfort, pressure relief and weight distribution in mind to meet your needs.

Varying levels of protection are available for static mattresses; it all depends on the foam chosen and where the profile sections are cut.

To make the choice easier for active mattresses, we have created a mattress selector based on maximum user weight, mattress width and user risk. This selector can be seen below.

We also offer hybrid mattresses to give you the ability to step up or step down the pressure relieving abilities of the mattress.

In this section you will find:

VISCO MULTIZONE STATIC MATTRESS

harvest

The Visco MultiZone mattress is our enhanced static mattress. Positioning specialist foam "Zones" across key areas of the mattress allows for more pressure relief around the most vulnerable anatomical areas of the body.

The varying firmness in foam at zonal areas contributes to greater immersion and envelopment resulting in greater pressure redistribution as well as providing additional support in the areas where it is needed most.

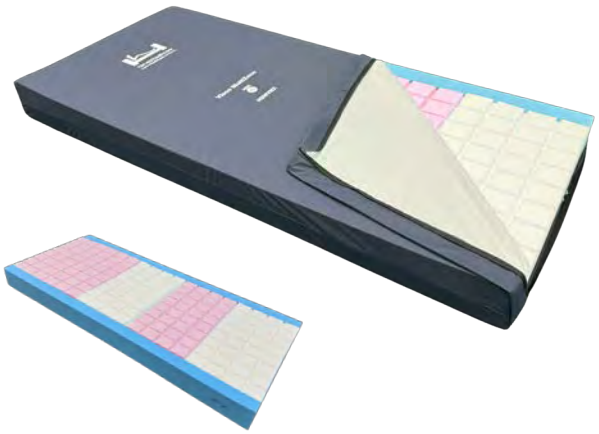

As standard across our mattress range, the Visco MultiZone mattress is complete with a vapour permeable, water resistant cover.

KEY FEATURES & BENEFITS

- Varying density of viscoelastic foam
- High-resilience foam base
- Memory foam visco-elastic, provides superior pressure redistribution, reducing the risk of developing a pressure ulcer.
- Can be used for residents with up to a grade 2 pressure ulcer
- Supplied with a four-way stretch, fully welded, water resistant, PU coated, polyester cover
- Comes with a 3-year warranty
- Very high risk

DIVAN MATTRESS

harvest

The Divan mattress is an affordable, comfortable option for those in need of a non-profiling mattress.
Covered with a cotton, woven material, the mattress also has a PVC, water resistant coating which allows the mattress to breathe. This is important, as the foam within will last longer and regain shape after use.
The Divan mattress includes:

- 13.5 gauge
- 3" inch diameter springs

Please note, the mattress has no pressure relieving properties and is not suitable for a profiling bed. The vandal proof and Fire-Tech versions of this mattress are also available on request for challenging environments, or environments at increased risk of fire.

TURNING

The National Bed Federation recommend that all mattresses should be turned once a month to allow for an even wear on the fillings, and to prevent mattress settlement. Turning a mattress is a condition of our manufacturer's warranty and may invalidate the warranty if this is not done.

CLEANING

The mattress should be wiped down with a solution of mild disinfectant and water. Do not use neat disinfectant as this will eventually affect the waterproof membrane. The mattress should not be left for a long time with incontinent patients on them as in extreme cases, fluid has been known to seep to the edges of the mattress and through the tape edging.

127kg/20st
max user weight

Our Divan bed is a great affordable option for your nursing home or community residents who are not in need of a profiling bed.

KINETIC AIR HYBRID MATTRESS

harvest

The Kinetic Air hybrid mattress is a replacement mattress system, combining air displacement technologies with the benefits of a static foam mattress.

A castellated foam top and high resilience base aid in comfort and support for the patient. The walls of the mattress provide additional support by containing the foam core.

As the patient moves, internal air pressure is redistributed through a system of valves. This redistribution prevents the patient from overheating whilst laying on the mattress, as the foam can breathe.

KEY FEATURES & BENEFITS

- Suitable for fully profiling beds
- Castellated visco foam top and high resilience foam base and walls
- Combination of softer and firmer cells at key locations for full and comfortable support
- Fully welded, antibacterial, water resistant, four way stretch cover
- High risk

3 year warranty

PRIME COMFORT ACTIVE HYBRID MATTRESS

harvest

The Prime Comfort Active mattress combines all the benefits of our Prime Comfort Plus mattress, plus so much more. The addition of cells gives the ability to step up or step down patient care with or without a pump.

Built using both static foam and alternating air cells, the mattress can be used with or without the pump. This combination means patients at a very high risk of developing pressure ulcers, will still be protected when the pump is not used.

Harvest 1 pump can be purchased separately.

KEY FEATURES & BENEFITS

- Firm 'U' shaped high density foam base for roll prevention and to aid transfers
- Castellated soft and resilient central foam insert
- 10 alternating cells powered by the low noise level pump
- Fully welded, antibacterial, water resistant, four way stretch cover
- Durable PVC base
- Step up step down with/without pump
- Compatible with Harvest pumps 1 and 250, allowing for a range of maximum patient weights
- Very high risk with pump
- High risk without pump

KENSINGTON OVERLAY ACTIVE MATTRESS

harvest

The Kensington Active Mattress is Harvest Healthcare's alternating overlay mattress, designed for patients at high risk of developing pressure ulcers. This active overlay is designed to be used on top of the patient's existing static mattress. It should not be used on its own.

The Kensington is light and easily manoeuvrable. If you have many patients in need of pressure reduction and relief, this overlay mattress is perfect for community use and provides a cost-effective, high-quality solution.

KEY FEATURES & BENEFITS

- 18 cells: 16 alternating cells made of TPU material to reduce noise when cells inflate and deflate and 2 static cells for patient stability and comfort
- Pillow section for patient stability
- All cells interchangeable for ease of repair and cleaning
- Low weight to allow the carer to easily move the mattress
- 4-way stretch welded PU cover which is vapour permeable, water resistant and has a Crib 5 fire rating
- High risk
- Compatible with Harvest pumps 1 and 250, allowing for a range of maximum patient weights
- Mattress weight: 6kg

SANDRINGHAM REPLACEMENT ACTIVE MATTRESS

harvest

The Sandringham Active Mattress is Harvest Healthcare's basic replacement mattress with 18 alternating cells and an integral 50mm layer of foam providing an overall depth of 160cm. A pillow section has 2 static cells for stability and comfort. The cells are made of TPU material to reduce noise disturbance when cells alternately inflate and deflate on a 10-minute cycle.

Being easy to maintain with interchangeable cells, this product provides the customer with excellent value for money when choosing an alternating mattress replacement to achieve pressure reduction for high risk patients in long-term care.

KEY FEATURES & BENEFITS

- 18 cells: 16 alternating cells made of TPU material to reduce noise when cells inflate and deflate and 2 static cells for patient stability and comfort
- 50mm insert of high-quality foam
- Pillow section for patient stability
- All cells interchangeable for ease of repair and cleaning
- Low weight to allow the carer to easily move the mattress
- 4-way stretch welded PU cover which is vapour permeable, water resistant and has a Crib 5 fire rating
- High risk
- Compatible with Harvest pumps 1 and 250, allowing for a range of maximum patient weights

HAMPTON II REPLACEMENT ACTIVE MATTRESS

harvest

The Hampton II provides a reliable active replacement mattress, designed to support the prevention and management of pressure ulcers for patients at very high risk, including patients with existing tissue damage.

The full air mattress is made up of 20 individual cells. 17 alternating air cells and 3 static pillow section cells.

The Hampton II mattress is designed for use in a range of healthcare environments as it is durable, provides reliability and is easy to use.

KEY FEATURES & BENEFITS

- Cell on cell feature ensure lower part of cell remains inflated providing a support surface in the event of a power fail
- Pillow section for patient stability and comfort
- Alternating therapy provided in a 1 in 2 over a 10 minute cycle
- No minimum user weight limit
- 4-way stretch, vapour permeable, anti-bacterial, welded PU cover with 360° covered zip to reduce fluid ingress
- Cable management system
- Fully modular system for ease of repair and cleaning
- Very high risk
- Compatible with all Harvest pumps, allowing for a range of maximum patient weights
- Available in the 900mm and 1050mm widths
- Mattress weight: 8kg

BALMORAL II REPLACEMENT ACTIVE MATTRESS

harvest

The Balmoral II Active Mattress is a full mattress replacement, which consists of air cells on a 50mm foam sub mattress. It has been designed to support the prevention and management of pressure ulcers for patients at very high risk, including patients with existing tissue damage, up to and including category 4.

It is made up of 27 individual PU cells: 23 alternating air cells and 4 static pillow section cells, on a 50mm foam sub mattress to support the patient in the event of power failure and provide additional support and stability. The narrower cells ensure the mattress meets the needs of a wider range of patients, including those needing additional support. The Balmoral II mattress is a high specification system designed for use in a range of healthcare environments as it is durable, provides reliability, peace of mind and is easy to use and maintain.

KEY FEATURES & BENEFITS

- Consists of 27 PU cells: 23 active and 4 static cells.
- 50mm foam sub mattress.
- Pillow section for patient stability and comfort.
- Alternating therapy provided in a 1 in 2 over a 10 minute cycle.
- Narrower cells meets the requirements of a wider range of users i.e. low weight.
- All cells interchangeable for ease of repair and cleaning
- No minimum user weight limit.
- 4-way stretch, vapour permeable, anti bacterial PU cover with 360° covered zip to reduce fluid ingress.
- Cable management system
- Fully modular system for ease of repair and cleaning
- Very high risk
- Compatible with Harvest 250 and Harvest 3 pumps
- Mattress weight: 10kg

BALMORAL PLUS REPLACEMENT ACTIVE MATTRESS

harvest

The Balmoral Plus Active Mattress is a full mattress replacement, which consists of air cells on an air sub mattress. It has been designed to support the prevention and management of pressure ulcers for patients at very high risk, including patients with existing tissue damage, up to and including category 4.

It is made up of 27 individual PU cells: 23 alternating air cells and 4 static pillow section cells, on a 50mm air sub mattress to support the patient in the event of power failure and provide additional support and stability. The narrower cells ensure the mattress meets the needs of a wider range of patients, including those needing additional support. The air sub mattress makes it easier to transport and provides improved infection control. The Balmoral Plus mattress is a high specification system designed for use in a range of healthcare environments as it is durable, provides reliability, peace of mind and is easy to use and maintain.

KEY FEATURES & BENEFITS

- Consists of 27 PU cells: 23 active and 4 static cells
- 50mm air sub mattress
- Pillow section for patient stability and comfort
- Narrower cells meets the requirements of a wider range of users i.e. low weight

DUKE REPLACEMENT ACTIVE MATTRESS

harvest

The Duke Active Mattress is a high-quality replacement mattress. Designed for a frailer user who could be vulnerable to developing pressure ulcers, the system provides a very high degree of pressure relief whilst protecting the user. It is recommended for use by a patient who is at very high risk of developing pressure ulcers, and for the treatment of up to stage 4 pressure ulcers.

The mattress is made up of 25 alternating air cells and 5 static pillow section cells. A 50mm integral foam base rests beneath the removable cell structure, providing more support and redistributing pressure where necessary.

KEY FEATURES & BENEFITS

- 30 independent cells provides more comfort and support
- Alternating pressure relief distributes the bodyweight of the service user to provide treatment for pressure ulcers
- Pillow section for patient stability
- All cells interchangeable for ease of repair and cleaning
- 4-way stretch welded PU cover which is vapour permeable, welded, water resistant and has a Crib 5 fire rating
- Fully modular system for ease of repair and cleaning.
- Very high risk
- Substantial pressure relief for service users
- Compatible with Harvest 250 and Harvest 3 pumps
- Cable management system
- Mattress weight: 9kg

PARTNERSHIP ACTIVE MATTRESS

harvest

The Partnership is a double sized active mattress, made up of both foam and alternating air cells – one on either side. Half is comprised of viscoelastic foam, which provides pressure reduction, comfort and support for the patient. The alternating air cells make up the other half, with a 10-minute cell cycle of inflation and deflation to provide effective pressure reduction.

It is a great solution for couples who share a bed and one of the partners is at high risk of developing pressure ulcers. The foam section provides comfort and support for the patient's partner, whilst the alternating cells provide pressure reduction and relief. This is the perfect mattress for high risk patients who have a double bed but require a solution for pressure reduction and relief to either prevent or promote healing of pressure ulcers.

KEY FEATURES & BENEFITS

- 10 independent cells
- Alternating pressure relief
- Visco topped static mattress and foam walls
- Maintains quality of life
- Removable cell structure aids decontamination
- Electronic pressure control
- Timed static mode
- Low running costs
- Quiet Operation
- CPR quick release facility
- 4-way stretch welded PU cover which is vapour permeable, welded, water resistant and has a Crib 5 fire rating
- High risk
- Compatible with Harvest 1 and Harvest 250 pumps

HAMPTON EXTRA REPLACEMENT PLUS SIZE ACTIVE MATTRESS

harvest

The Hampton Extra replacement is Harvest Healthcare's plus size active mattress. Designed for plus size patients at very high risk of developing pressure ulcers.

It has 17 alternating cells made of Nylon with a TPU lining to reduce noise when the cells inflate and deflate and a pillow section with 3 static cells for patient stability.

The foam surround allows for a wider mattress to be used on a 1200 wide bed, like the Community 1200 and the Ultimate 1200 and provides extra stability for transfers. It also improves stability when transferring from bed to chair, and prevents bottoming out. This mattress is essential for those wanting to provide the right equipment for plus size patients.

KEY FEATURES & BENEFITS

- 20 cells made of Nylon with a TPU lining to reduce noise when cells inflate and deflate
- Pillow section for patient stability
- All cells interchangeable for ease of repair and cleaning
- 4-way stretch welded PU cover which is vapour permeable, water resistant and has a Crib 5 fire rating
- Foam surround
- Very high risk
- Compatible with Harvest 3 pump

DUKE EXTRA 2.0 REPLACEMENT PLUS SIZE ACTIVE MATTRESS

harvest

The Duke Extra 2.0 is an alternating pressure relieving mattress system used in the prevention and treatment of pressure ulcers. It is recommended for use by a patient who is at very high risk of developing pressure ulcers, and for the treatment of up to stage 4 pressure ulcers.

The mattress is made up of 25 alternating air cells and 4 static pillow section cells at the head end. With a maximum patient weight of 50 Stone, this mattress is suitable for larger patients.

Edge to edge alternating cells provide pressure reduction across the full width of the mattress offering alternating pressure care at all points. It has been designed to fit the wider beds in our product range such as the Community 1200 and the Ultimate 1200 wide profiling beds.

KEY FEATURES & BENEFITS

- 29 cells provide more comfort and support
- Alternating pressure relief
- CPR rapid deflation valve
- 4-way stretch welded PU cover which is vapour permeable, water resistant and has a Crib 5 fire rating
- Quiet operation
- Electronic pressure control

WONDERMAT ACTIVE MATTRESS

harvest

The Wondermat Active Mattress is designed to constantly maintain interface pressures, below capillary closure powered by the Wondermat pump for very high risk patients.

The low air loss Wondermat Replacement System is designed to constantly maintain low interface pressures to prevent capillary closure.

This mattress is aimed at patients who are at the highest risk of developing pressure ulcers and moisture damage and need equipment that is right for them in terms of pressure reduction and relief, control of moisture, and optimised comfort.

KEY FEATURES & BENEFITS

- Rapid auto firm
- Tri-zonal feature
- Fowler mode
- Electronic pressure control
- Lockout to avoid unauthorised changes to settings
- Low pressure / power failure visual and audible alarms
- Self diagnosis check
- CPR quick release facility
- Complete with quilted vapour permeable water resistant cover

ROTATIONAL ACTIVE MATTRESS

harvest

The Rotational Active Mattress is a high-quality, replacement active mattress system which offers three-in-one therapy for the effective prevention of pressure ulcers. This includes lateral turning therapy, alternating therapy, and continuous low-pressure therapy. Designed to assist with pulmonary complications and treatment of existing pressure ulcers, the mattress is suitable for patients in need of regular re-positional changes where this cannot be achieved by the patient or carers.

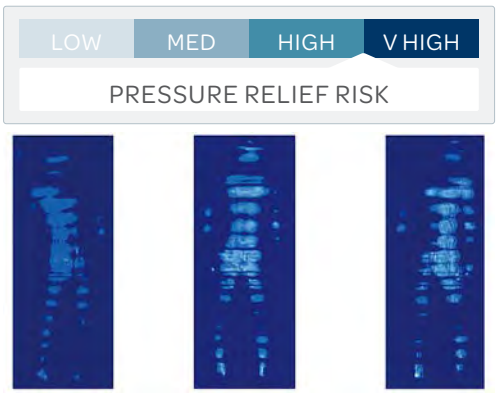

During lateral turning therapy, the carer can achieve easier repositioning with support from the mattress. The mattress helps facilitate postural drainage, especially for immobile patients. Also, during lateral turning therapy, the alternating therapy can be activated simultaneously. This function improves circulation and skin reperfusion and provides effective pressure relief via selectable cycle time. The continuous low-pressure therapy can provide body immersion for optimal comfort as a larger skin area will be supported by lower air pressure. This active mattress can significantly lower the risk of pressure ulcers while helping carers facilitate repositioning with this automatic system. Full training on use is provided by the team at Harvest and this system is compatible with the Harvest profiling beds.

KEY FEATURES & BENEFITS

- Up to 30° of bilateral turning therapy to assist patient repositioning and enhance pressure relief
- Offering extra support in the sacral area when in and during sitting position
- Fast inflation time & electronic pressure control
- Heel pressure relief function
- Improving circulation & skin reperfusion
- Lockout to avoid unauthorised changes to settings
- Low pressure / power failure visual and audible alarms
- CPR quick release facility
- Complete with low friction and sheer vapour permeable, high flame retardant, water resistant cover
- Transport mode
- Cable management for a safe operational environment
- Suitable for fully profiling beds
- High to very high risk

3 year warranty

FOLDING FALL MAT

The Harvest Folding Fall Mat offers the same level of safety as the standard fall mat, with additional advantages.
Manufactured using similar foam as our static mattresses, in the event of a patient fall, a soft landing is provided. This particular fall mat can be folded and stored away when not in use.
Fall mats are ideal for patients in Low or Ultra Low Beds; with the beds being closer to the floor itself, the patients can simply roll onto the fall mat.
The fall mats are complete with a vapour permeable cover and non-slip base.

Product Information

Product Code	Dimensions
HFM104NS	1800(L)x640(W)x64(H)

FALL MATS

Harvest's high density, foam fall mats provide additional safety to those who are at risk of rolling. Should users be in a Woburn Low or Woburn Ultra-Low Bed, without the use of siderails, the fall mat will provide a soft landing should they roll too far. Available in various sizes.

VISCOFLEX PLUS CUSHION

harvest

The Viscoflex Plus cushion is a very high density viscoelastic, moulded cushion with an ergonomically shaped load bearing core.

The core is shaped to give optimal immersion in sacral/ischial areas, reducing pressure and facilitating blood circulation. The outer foam is moulded to promote stability and increase the contact area. The skin effect of the moulded foam also gives protection from tearing or crumbling.

This ultra-light cushion is specially designed to provide high levels of stability and pressure relief for the user. It is supplied with a vapour-permeable, water resistant cover.

KEY FEATURES & BENEFITS

- Injected foam
- Welded, water resistant, four-way stretch cover
- Can be paired with our Viscoflex Multibearing mattress for 24 hour pressure care
- Available in 3 different sizes
- High to very high risk

3 year warranty

MIXTE CUSHION

harvest

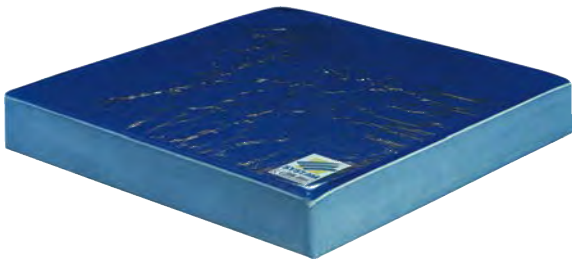

The Mixte cushion is a combination of gel and foam. Reticulated polyurethane gel avoids migration and thus prevents penetration (punching) of the cushion while assisting pressure distribution.

The thick high resilience foam base increases the contact area, providing better distribution, comfort and stability. The two layers are permanently bonded together, eliminating the risk of separation.

KEY FEATURES & BENEFITS

- Gel top on foam
- Welded, water resistant, four-way stretch cover
- Can be paired with our Prime Comfort mattress for 24 hour pressure care
- Medium to high risk

3 year warranty

DUOFORM CUSHION

harvest

The Duoform® cushion is an anatomically moulded base of high-resilience foam surmounted by a two-part viscoelastic gel. The white pad fluid gel ensures pressure reduction on high risk areas, while the blue viscoelastic gel resists fluid migration thus preventing penetration and providing added support.

The high-resilience foam base enables the cushion to better adapt to bony protuberances, spreads contact surfaces and gives better pressure distribution. It has a highly breathable cover.

KEY FEATURES & BENEFITS

- Anatomically moulded two-part gel on foam
- Welded, four-way stretch, highly breathable cover
- Can be paired with our Prime Comfort Plus mattress for 24 hour pressure care
- Available in 4 different sizes
- Medium to high risk

AIRSET CUSHION

harvest

The Harvest Healthcare AirSet Cushion is a state-of-the-art pressure care solution that boasts an innovative hybrid design, combining the benefits of foam and air to provide optimal pressure relief.

Users can easily adjust the cushion to their desired level of pressure relief, thanks to its self-inflating technology, ensuring maximum comfort and support. The cushion is climate-controlled, helping maintain a comfortable seating temperature, reducing the risk of heat build-up and pressure ulcers. The AirSet Cushion's unique construction allows it to distribute pressure evenly across the seating surface, promoting healthy circulation and reducing the risk of injury.

KEY FEATURES & BENEFITS

- Innovative hybrid design, combining the benefits of foam and air
- Self-inflating technology for easy pressure adjustment
- Climate-controlled for a comfortable seating temperature
- Even pressure distribution across the seating surface
- Promotes healthy circulation
- Washable with fully enclosed foam
- High risk

(P161MFPMHF120)
High-Very High Risk - SWL: 285kg

ONE
REDUCE THE LOAD ON RISK ZONES

Protected risk zones (sacrum/ischium), even in the cases of pelvic retroversion, in order to provide partial relief of bony protuberances through support.

TWO
ANTI-PUNCHING SYSTEM

Specifically positioned in relation to the ischium. Distributes the pressure to the buttock peripheral zone, stabilising pelvis support and preventing it from reaching the bottom zone.

THREE
PRE-ISCHIAL RIDGE

Blocks the ischium, thus preventing forward sliding.

*Please note information supplied here is a guide, If you would like more information or help with making the correct choice, please call our team today.

ULTRA-THIN CUSHION

harvest

The Ultra-Thin Cushion has been developed for use with a range of chairs. The viscoelastic foam offers excellent comfort, support and pressure distribution.

Available separately, each 35mm thick cushion provides enhanced pressure distribution to the existing chair cushion, without compromising user posture. The thin nature of the cushion also ensures the patient remains safely in the chair as the arms can still be a barrier.

This lightweight cushion is also available as a leg and lumbar system and comes with a full strap system to secure it to the chair. Comes with a water resistant, vapour permeable cover with an anti slip base.

KEY FEATURES & BENEFITS

- Viscoelastic foam
- Zipped, vapour permeable, water resistant, four-way stretch cover
- Non-slip base
- Can be paired with our Reflect mattress for 24 hour pressure care
- Available in 2 different sizes
- Complete system consisting of seat, leg and lumbar pieces is also available (HFC143COM)

3. POSITIONING AIDS

The Heel Pads and Positioning Aids from Harvest Healthcare, feature high-quality, ergonomically designed aids, which support and comfort patients. For best use when in beds and chairs, the positioning aids protect the relevant parts of the body from pressure damage and help to prevent skin damage at vulnerable locations.

INTEGRAL HEEL SUPPORT

harvest

The Integral Heel Support is made of viscoelastic foam with memory effect. The heel is cushioned by the moulded high density memory foam, which is shaped to protect wear on the achilles tendon and heel and direct pressure towards lower risk areas. The heel support is particularly well suited to patients with normal or slightly limited mobility. It is also ideal for prevention in agitated patients or those subject to constant movement of the lower limbs.

This comfort boot comes with a washable, breathable cover and is fitted using soft Hook and Loop straps, to tailor the perfect fit even to users with lower limb oedema.

KEY FEATURES & BENEFITS

- Heel area hollowed out to provide protection against friction effects
- Sides of the forefoot sections hollowed out to divert pressure towards the surrounding areas at lower risk
- Achilles tendon protected by side supports that direct pressure towards areas at lower risk

MATERIAL

Visco foam; moulded and of very high density (80kg/m3, medical grade) memory foam.

Able to mould to the body to provide better reduction of pressure on areas at high risk of ulcers.

3 year warranty

Product Information

Product Code	Description	Dimensions
P901T1HW	Integral Heel Support Viscoelastic Foam with Memory Foam	550(L) x 250 (W) x 75(H)mm

HEEL PAD

harvest

The Heel Pad is made of soft viscoelastic foam with memory effect and stronger viscoelastic foam for support. The multibearing surface concept shifts pressure from areas at high risk to areas at low risk and the end can be tucked under and secured if full pressure relief for the heels is required.

Available in single or double width, these clever positioning aids are excellent for protecting the heels and feet in those that are less mobile.

Well suited for people with moderate loss of mobility in lower limbs at medium to very high risk of pressure ulcers.

KEY FEATURES & BENEFITS

- Raised sides to avoid limbs slipping off
- Sloped to decrease pressure either partly or fully on the heel
- Long to support the knee and avoid hyperextension
- Width enables freedom of movement
- Available in half size to enable different positions for each leg

MATERIAL

Visco foam; moulded and of very high density (80kg/m3, medical grade) memory foam.

Able to mould to the body to provide better reduction of pressures on areas at high risk of ulcers.

3 year warranty

Product Information

Product Code	Description	Dimensions
P902T1HW	Heel Pad	730(L)x640(W)x105(H)mm
P904T1HW	Half Heel Pad	730(L)x320(W)x105(H)mm

HEEL SUPPORT BOOT

harvest

The Heel Support Boot is made of viscoelastic foam with memory effect. Well suited for people with low mobility in lower limbs to assist in the prevention and treatment of pressure ulcers. This zero heel pressure boot comes with a washable, breathable cover.

The high density visco foam is moulded for comfort and to prevent rotation and heel/tendon pressure, protecting all aspects of the foot.

KEY FEATURES & BENEFITS

- Heel area hollowed out for zero pressure
- Hollow area beneath the achilles tendon to reduce pressure
- Curved outline to distribute pressure evenly
- Prevents equinus distortion and rotation

MATERIAL

Visco foam; moulded and of very high density (80kg/m3, medical grade) memory foam.

Able to mould to the body to provide better reduction of pressures on areas at high risk of ulcers.

3 year warranty

P903T1HW	Half Support Boot	635(L)x220(W)x310(H)mm

SEMI-FOWLER RETRACTION WEDGE

harvest

The Semi-Fowler Retraction Wedge is made of high resiliency foam enabling positions to be maintained over time for effective treatment. Recommended for the prevention and treatment of pressure ulcers on the sacrum, this wedge can be used in conjunction with a range of heel-specific aids for more tailored care.

KEY FEATURES & BENEFITS

- Heel area hollowed out for zero pressure
- Hollow area beneath the achilles tendon to reduce pressure
- Curved outline to distribute pressure evenly
- Prevents equinus distortion and rotation

MATERIAL

Visco foam; moulded and of very high density (80kg/m3, medical grade) memory foam.

Able to mould to the body to provide better reduction of pressure on areas at high risk of ulcers.

3 year warranty

Product Information

Product Code	Description	Dimensions
P905T1HW	Semi-Fowler Retraction	620(L)x700(W)x75(H)mm

30⁰ POSITIONING WEDGES

harvest

The Positioning Wedge is made of memory foam with a stabilisation section made of high resiliency foam, designed to keep residents comfortable and stable in a 30-degree position, whilst also maintaining pressure relief. This comfortable positioning aid reduces the need for pillows or other bedding being used to support turns, gives carers peace of mind that their resident is in the optimum position, and also helps the resident maintain position when unmonitored.

The stabilisation insert enables the 30⁰ position to be maintained over time by acting as a support structure. Available full sized or in half for the left or right side.

KEY FEATURES & BENEFITS

- Supports lower limb at the thigh level
- Hollowed out in sacrum area to relieve pressure and reduce painful contact areas
- Anatomical shape moulds to the body
- Reduced width of wedge allows the patient to be centred on the bed, avoids accidental contact with siderails and stops it from becoming lodged between the siderails

MATERIAL

- Visco foam*
- High resiliency foam**

3 year warranty

Visco Foam: Moulded and of very high density (80kg/m³, medical grade) memory foam.

Able to mould to the body to provide better reduction of pressures on areas at high risk of ulcers.*

High Resiliency Foam: Its mechanical properties (elasticity, flexibility) and high density (40kg/m³) enable positions to be maintained over time, enabling effective treatment.**

Product Information

Product Code	Description	Dimensions
P910L1HW	30 Degree Lateral Positioning Wedge with Cover	990(L)x550(W)x150(H)mm
P910LD1HW	30 Degree Lateral Positioning Half Wedge RHS Tilt	990(L)x280(W)x150(H)mm
P910LG1HW	30 Degree Lateral Positioning Half Wedge LHS Tilt	990(L)x280(W)x150(H)mm

POSITIONING WEDGES FOR UPPER LIMBS

harvest

The Wedge is made of viscoelastic foam with memory effect. Designed to prevent and treat oedema. Available to support the whole arm or just the lower part.

Anatomically shaped to help comfort, can be used on both the left and right side, extension of the elbow in lying position avoids restricting vein perfusion in the forearm.

KEY FEATURES & BENEFITS

- Anatomically shaped to help comfort and maintain the position of the upper limbs over time
- Allows access for a drip to be used
- Can be used on both the left and right side
- Extension of the elbow in lying position avoids restricting vein perfusion in the forearm

MATERIAL

Visco foam; moulded and of very high density (80kg/m3, medical grade) memory foam.

Able to mould to the body to provide better reduction of pressure on areas at high risk of ulcers.

3 year warranty

Product Information

Product Code	Description	Dimensions
P912L1HW	Positioning wedge for Upper Limbs	650(L)x370(W)x160(H)mm
P915L1HW	Positioning wedge for Upper Limbs	490(L)x190(W)x160(H)mm

ABDUCTION WEDGE

harvest

The Abduction Wedge is made of high resiliency foam. Recommended for the prevention of postoperative dislocation and to help stabilise the legs in a position.

KEY FEATURES & BENEFITS

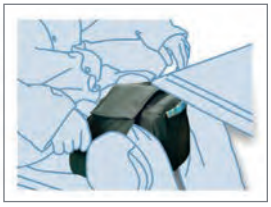

- Anatomically shaped to fit the natural angle between the lower limbs to ensure optimal distribution of pressure areas
- Fine curved tip to help carers position the wedge easily
- High enough for use in a chair and low enough to fit under a table

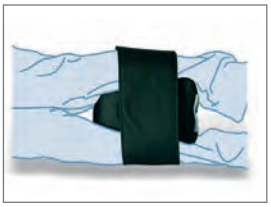

MATERIAL

High resiliency foam; its mechanical properties (elasticity, flexibility) and high density (40kg/m3) enable positions to be maintained over time, enabling effective treatment.

3 year warranty

Product Information

Product Code	Description	Dimensions
P911L1HW	Abduction Wedge	240(L)x160(W)x180(H)mm

OCCIPITAL SYSTEM

harvest

The Occipital System provides prevention and positioning aid for the occipital area.

MATERIAL

Visco foam; moulded and of very high density (80kg/m3, medical grade) memory foam.

Able to mould to the body to provide better reduction of pressures on areas at high risk of ulcers.

Viscoelastic foam with shape memory;

Defined body moulding and increased body surface area in contact with the foam

More effective distribution of pressure; reduction of transcutaneous pressure on high risk zones, facilitated blood flow

Increased comfort and more effective maintenance of patient position

3 year warranty

P914L	Universal Cushion Large	600(L)x400(W)x130(H)mm

ABDUCTION BLOCK FOR KNEES
CYLINDRICAL CUSHION

harvest

The **Abduction Block for Knees** is made of microbeads. The simultaneous use of the abduction block and cylindrical cushion achieves a comfortable Semi-Fowler position for the user. It also supports the dorsal position by firmly holding the pelvis and abducted areas in place thanks to the semi-circle cushion. Provides inner protection for the inner sides of the knees.

The **Cylindrical Cushion** is made of microbeads. Can be placed under the knees to maintain lower limbs in a Semi-Fowler position.

MATERIAL

Expanded polystyrene microbeads
Very light material: expanded polystyrene microbeads with small granulometry for enhanced comfort and adaptability of support to the patient's body.

Synthetic polyester fibre
Strong and resistant to stretching and shrinking. Retains air volume providing a soft sensation and increased comfort.

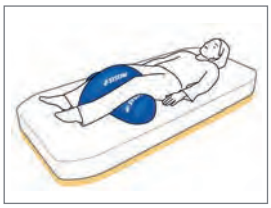

3 year warranty

Cylindrical Cushion

Product Information

Product Code	Description	Dimensions
P9703B1HW	Abduction Block for Knees	620(L)x320(W)
P9702B1HW	Cylinder Cushion	600(L)x200(Diameter)mm

UNIVERSAL CUSHION
RING CUSHION

harvest

The **Universal Cushion** is made of microbeads. It helps support the patient, relieves the pressure on the heels, protects the internal lateral knee areas, ankles and can be used as a pillow. It also comes in two sizes, small and standard.

The **Ring Cushion** is also made of microbeads. It comfortably supports the head both in a sitting or semi-reclined position and has an easy-to-use, self gripping strip.

MATERIAL

Expanded polystyrene microbeads
Very light material: expanded polystyrene microbeads with small granulometry for enhanced comfort and adaptability of support to the patient's body.

Synthetic polyester fibre
Strong and resistant to stretching and shrinking. Retains air volume providing a soft sensation and increased comfort.

3 year warranty

Universal Small and Standard Cushion

Ring Cushion

Product Information

Product Code	Description	Dimensions
P9700B1HW	Universal Cushion	350(L)x260(W)mm Small / 560(L)x400(W)mm Standard
P9704B1HW	Ring Cushion	500(Diameter)mm

HALF-MOON CUSHION
LATERAL POSITIONING CUSHION

harvest

The **Half-Moon Cushion** is made of microbeads. It holds the pelvis and upper body firmly in place when the user is in the Semi-Fowler or dorsal position and relieves pressure on elbows. Fitted with a strap for extra support to keep the head in position, it can be used on a wheelchair.

The **Lateral Positioning Cushion** is made of microbeads. Designed with an integrated pillow for optimal comfort, it ensures comfortable positioning of the knees, pelvis and upper body when in the lateral position. It is compatible with all patient sizes.

MATERIAL

Expanded polystyrene microbeads
Very light material: expanded polystyrene microbeads with small granulometry for enhanced comfort and adaptability of support to the patient's body.

Synthetic polyester fibre
Strong and resistant to stretching and shrinking. Retains air volume providing a soft sensation and increased comfort.

Both of them use an Easy Shape system to maintain a position that is adapted to the patient's body, thereby increasing comfort. By pulling on the straps, the curvature of the cushion increases and the shape is maintained by tieing the straps.

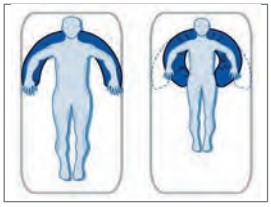

3 year warranty

4. NURSE CALL ALARM SYSTEM

The prevention and management of falls is an important issue in maintaining a patient's quality of life in a care home environment. Harvest Healthcare produce a variety of products to assist in the likelihood of falls and sound an alert on patient movement. Our advanced alert system can be used in conjunction with an existing nurse call system and integrated into the framework of our Woburn bed range.

If you're not sure which nurse call system suits your needs please see our nurse call alarm flowchart guidance (page 91).

NURSE CALL ALARM WIRED SYSTEM

harvest

Harvest Healthcare alarm systems are available for use with both seating and mattresses, and can also be connected to your current nurse call system. Be alerted immediately, or with a time delay, whenever one of your residents leaves their bed or chair.

Adjustable volume, optional alarm tones, and a silent mode function when connected to your nurse call system, all mean that you can set up your system to work best for you.

The alarm systems are supplied with a charger as standard, but can also be battery operated (batteries not included).

KEY FEATURES & BENEFITS

- Compact
- Easily connected
- Can be used with existing nurse call system
- Adjustable volume and silent mode
- Delayed alarm mode
- Can be battery operated

Nurse Call Floor Pressure Pad

NURSE CALL ALARM WIRELESS SYSTEM

harvest

The Guardian is a modern wireless falls alarm system. Its fundamental purpose is to act as a pressure-sensitive warning system to alert nurses and carers to unexpected and potentially dangerous movements from users.

Triggered by a release or applied pressure to a surface, the Guardian can be configured to suit an extensive range of situations and requirements.

The package includes 1 Receiver, 1 transmitters and a power supply. The Guardian can also be used with Harvest wired sensor mats HLV301S and HLV301M . Additional components can be purchased separately.

KEY FEATURES & BENEFITS

- Safe and versatile wireless system
- Compatible with most nurse call systems*
- Simple to set up and use
- Up to 12 months of battery life for the transmitter and up to 3 months for the receiver.
- Pair with up to 8 transmitters.
- Can be paired with a variety of sensor mats to suit different situations.
- Automatically adjusts the trigger depending on which sensor mat is used.
- Patient care function reverts to normal operation after 10 minutes (no alarm triggers while giving care). Works on both normally open and normally closed systems.
- Silent alarm function (activates nurse call system with no noise at the source).
- Low battery warning for receiver and transmitters (before function is interrupted).

Guardian Receiver

Guardian Transmitters

*Different connections are required for different nurse call systems, please ask for more information.

5. MOVING AND HANDLING

Harvest Healthcare offer a comprehensive range of moving and handling equipment which consists of hoists, stand aids and slings and bed management systems. Suited to a wide range of care environments the equipment provide excellent solutions for moving and handling problems. Promoting mobility and allowing daily handling routines effectively, the products are designed with the comfort, safety and ergonomics of both caregiver and user in mind.

In this section you will find:

Stand Aids, Hoists and Transfer Aids

Slings

Bed Management Systems

Wheelchairs

OXFORD SWITCH PATIENT TURNER

oxford

The Oxford Switch, part of the Professional Series, is a manual stand assist device, designed to help a person with reduced mobility, stand from a seated position and enable short distance transfers from one place to another. For added convenience, the Switch quickly and easily splits into two components for storage and onward transit. The Switch is simple and swiftly deployable thanks to its straightforward, non-powered design. It also benefits from simple servicing and maintenance needs when compared to a traditional electric stand aid. As a rehabilitation aid, the Switch actively encourages the user to participate in the standing process, engaging core muscle groups and improving strength and function. In addition, the optional Patient Handling Belt provides additional standing support for the patient and offers grab handles and an adjustable looped strap that offer the carer a means of providing further assistance during standing.

KEY FEATURES & BENEFITS

- Versatile and easy to manoeuvre
- Easy to transport and store
- Adjustable knee pad and optional padded covers
- Ergonomic design considerations
- Simplistic on-going maintenance routines
- Optional Patient Handling Belt for additional support

OLYMPIC PATIENT MOVER

harvest

Simple and intuitive to use, the Olympic Patient Mover is an attractive, quick and universal resident transport solution. Using the Olympic Patient Mover allows resident transfers with minimal handling and with more efficiency than other transfer options. The Olympic Patient Mover supports residents to move comfortably from a seated to a standing position, and promotes early mobilisation.

KEY FEATURES & BENEFITS

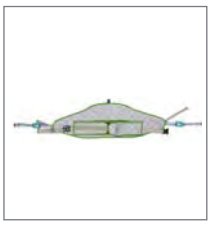

- Provides easy and more efficient transportation to the bathroom and toilet
- Offers a suitable alternative to a wheelchair
- Allows for better eye contact between the user and carer
- Padded knee support for extra comfort
- Manual leg open & closing
- Compatible with the Mackworth back support belt

ASCENT 180 STAND AID

harvest

The Ascent 180 Stand Aid has an impressive range of ergonomic features to provide a safe and dignified lift.

It is uniquely designed to provide three functions; as a transfer hoist, as a sit to stand hoist and as an aid to rehabilitation by assisted standing.

Suitable for transferring patients into a wheelchair, onto toileting facilities, onto a bed, or for many other assisted transfers, the Ascent 180 Stand Aid is also excellent for standing exercises and promoting mobility.

KEY FEATURES & BENEFITS

- Ability to lift a wide range of people from 4ft – 6ft 5"
- Compact and easily manoeuvred
- Profiled push handles designed in conjunction with the REBA assessment tool allows for safe moving and positioning
- Powered leg opening allows for a stable and safer lift without restricting access around chairs and beds
- Front castors and rear castors for maximum control and positioning on all floor surfaces
- Multi-directional knee pad allows for individual adjustment to provide full support
- Rear foot bar helps to negotiate the stand aid over uneven floor surfaces and door thresholds

5 year warranty

180kg/28st max user weight

OLYMPIC 180 HOIST

harvest

The Olympic 180 Hoist benefits from the rigorous ergonomic design procedures and quality checks. It has been constructed from high-quality powder coated steel that will provide years of reliable service. The hoist boasts an impressive 180kg lifting capacity, powered leg opening and market leading Linak® actuators and motors.

The Hoist Actuator Pad is also available as an optional extra. The Actuator Pad provides a protective layer to minimise any risk of issue surrounding body parts coming in to contact with hoist actuators, without losing any functionality to the hoist.

KEY FEATURES & BENEFITS

- Cost-effective solution without compromising on quality
- Robust powder coated steel frame
- Linak control system
- Electric leg opening as standard
- Red emergency lowering screw
- Easy to position with 4 large swivel castors and ergonomic handle
- Tool free assembly
- Single person installation
- Can lift a patient from the floor
- 75mm front castors and 100mm rear castors
- Available with a scales unit incorporating QRS feature which is a dignified, accurate and convenient method of determining body mass by weighing an individual whilst situated in a sling and suspended by the Olympic 180 hoist

OXFORD ADVANCE HOIST

oxford

The Oxford Advance folding mobile patient hoist is one of the most functional and stylish in its class. It is ideally suited to homecare and small nursing institutions where space sometimes is simply not available.

This compact hoist is able to get closer in and around furniture thanks to its angular leg design. It can assist with many lifting and transfer requirements as it adapts well to a variety of settings, including transferring patients from the floor, a bed, a wheelchair, or a toilet. It will also fit into the trunk of most family saloon vehicles, making it ideal for taking on vacations or day trips.

KEY FEATURES & BENEFITS

- Compact triangular folding design for easy transport and storage
- Smart Monitor diagnostic and service controls as standard
- Ergonomic design considerations and interaction points
- Angled leg design ensures excellent access around furniture
- Optional shallow 4-point positioning cradle (negates folding function)
- Integrated safety systems to help protect patients

OXFORD PRESENCE HOIST

oxford

The Oxford Presence Professional hoist is a heavy-duty mobile patient hoist, competent enough to handle most patient lifting and transfer needs. It has an incredible range of motion, which ensures critical and high-level surface transfers are carried out with relative ease. This durable hoist is designed to offer comfort and versatility during use.

KEY FEATURES & BENEFITS

- Outstanding lifting range (440mm – 1910mm)
- Smart Monitor diagnostic service controls as standard
- Interchangeable spreader bar and cradle options
- Ergonomic design considerations and intuitive interaction points
- Powered leg positioning for excellent access around furniture
- Low leg model available suitable for use around low bed frames
- Integrated safety systems to help protect patients
- Powered cradle and digital weigh-scale options

UNIVERSAL DELUXE SLING

harvest

This multi-purpose sling is designed to offer excellent support, and to be used for the majority of patients, including for bathing when using super soft material.

Available in polyester which is versatile, breathable and durable.

It is also available in super soft 3-dimensional fabric which is breathable, very durable and provides excellent pressure distribution. Super soft fabric is also fast drying and therefore suitable for bathing.

KEY FEATURES & BENEFITS

- Can be applied and removed while seated in a chair
- Full padded support of upper thigh reduces hip rotation and abduction
- Available in a range of sizes
- Available in Polyester and Super Soft material
- Pocket in the back of the sling to aid proper fitting
- Available with head support
- Also available with clip fastening
- Extra stitching to improve life and safe working load of the sling
- Information stitched into label to protect when washing

Sling Sizing Guide

1. Measure the width of your resident between the outer midpoints of each upper arm as per the diagram (W).
2. Compare your measurement with the 'User Width' range for the selected sling type in the table below.
3. Measure the back length of your resident as per the diagram (B1/B2).
4. Compare your measurement with the 'User Back Length' range for the selected sling type in the table below. Please note some ranges overlap, in these cases select the most appropriate size.
5. If these two measurements correlate, your resident fits a standard sling. If not, consider a bespoke sling or select the most appropriate standard sling after a risk assessment.

All sling selections should be accompanied by a risk assessment by a trained person. People of atypical anatomy may not be suited to a standard sling.

The Harvest Tape Measure (HSLTAPE) and Sling Assessment Guides are available on request.

FREEWAY FALLS RECOVERY SLING

freeway

The Freeway Falls Recovery Sling allows carers to safely transfer a person that needs assistance immediately after a fall. It has a versatile, one size fits all design, so is suitable for both adults and children.

The Freeway Falls Recovery Sling allows for the fallen person to be rolled onto the sling whilst in a lying position. Once moved onto the sling, the person can be easily slid to a more open area if required, for the suitable positioning of a hoist. The person can then be hoisted up off the floor and safely into a chair or bed.

KEY FEATURES & BENEFITS

- Versatile design – suitable for adults and children
- Strong, yet built for comfort
- Low friction material for comfortable transfer and sliding of a person (the yellow side)
- Easy application and removal
- Integral space saving storage and carry bag
- Machine washable

MACKWORTH ESSENTIALS SATIN SHEET

mackworth

The Mackworth Essentials Satin Sheet range is designed to reduce lifting associated strains and injuries to caregivers, whilst providing a solution for patients who require frequent repositioning.

The system consists of two components; a synthetic, breathable satin base sheet with a low friction central section and a soft top sheet with low friction backing. The Mackworth Essentials Satin Sheet range features handles on the Top Sheet to facilitate easier movement and use in conjunction with hoists.

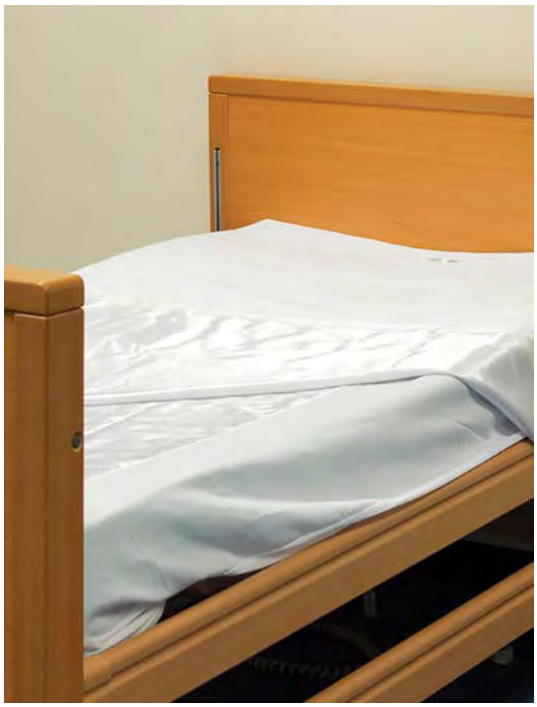

KEY FEATURES & BENEFITS

Base Sheet

- Available in standard and bariatric mattress sizes
- UltraKnit synthetic quick-drying, durable material
- Central low friction panel with carbon fibres to prevent static build-up

Top Sheet

- Maxi (full bed) and Midi (half bed) sizes
- WhooTex synthetic soft feel material
- Handles for easier positioning and use with hoists
- Low friction backing with carbon fibres to prevent static build-up

FREEWAY BED MANAGEMENT SYSTEM FREEWAY BODY SUPPORT WEDGE

freeway

The **Freeway Bed Management System** (bariatric) is an easy-to-use, low-friction solution for patients who need frequent repositioning. It provides comfort, reduces pressure ulcers, and requires minimal caregiver effort. Compatible with four-section profiling beds and pressure care mattresses, it can also be used with a hoist for turning assistance. It is available as a standard or bariatric version.

The **Freeway Support Wedge** is an essential Freeway Bed Management System companion. It is designed to provide optimal support for patients in bed while assisting them in maintaining the desired position without needing a carer to hold them in place.

KEY FEATURES & BENEFITS

Bed Management System

- Provides comfort for patients
- Minimal effort from carers
- Ideal for use by a single carer
- Works easily with four section profiling beds
- Can be used on a pressure care mattress
- Can also be used with a hoist to assist turning

Body Support Wedge

- Provides a positive non-slip action when used against cotton bed linen
- Can be used to help reduce the incidence of pressure ulcers
- Made from 100% soft and flame retardant foam
- The polyurethane cover can be machine washed up to 80°C
- The nylon cover can be wiped clean with disinfectant

MULTIGLOVE
LIMB LIFTER AND SLIDE SHEETS

prism

The **Prism Multiglove** enables carers to facilitate various moving and handling applications easily due to its low friction. It is a simple but effective piece of equipment and can be used to bring a person to a sitting position in a profiling bed, as the anti-shear material helps to smooth and release the tension on the skin.

Product Code	Description
2002ACCPM-MGLOVE	Prism Multiglove (Pair)

The **Prism Limb Lifter** has been designed to support limbs, allowing a number of procedures to be completed, i.e. wound care, without the carer having to support the limb. The Prism Limb Lifter can be easily attached to a hoist, enabling the carer to perform procedures in the safest possible working environment, eliminating the possibility of strain or injury from supporting the limb themselves.

Coloured inset loops are featured to aid correct positioning of the Prism Limb Lifter when attaching to a hoist. Each Prism Limb Lifter is supplied with two removable washable covers. Additional washable covers can be purchased here.

The product is machine washable up to 72°C.

PRISM ONE WAY GLIDE
PRISM HANDLING BELT

prism

The **Prism One Way Glide Sheets** help a patient maintain a good sitting position and allow repositioning on a chair or bed.

The one-way glide will only slide in the direction of the arrows which are clearly labelled on the sheets. It can be used on all surfaces and helps prevent a patient from sliding forward in a wheelchair/day chair/bed and aids the positioning of a patient into a good sitting position.

Product Information

Product Code	Description
2002ACCPM-OWGS14	Prism One Way Glide - Single 1400 x 430
2002ACCPM-OWGS70	Prism One Way Glide - Single 700 x 430
2002ACCPM-OWGT60	Prism One Way Glide - Tube 600 x 430
2002ACCPM-OWGT73	Prism One Way Glide - Tube 730 x 600

The **Prism Comfi Belt** helps carers perform assisted manoeuvres and transfers safely whilst minimising the risk of injury to themselves or the user. It has been designed to provide high levels of comfort to the user whilst providing the best possible grip and handling positions for the carer. Available in three separate sizes, each of which is also adjustable to ensure the perfect fit for waist sizes from 22 inch (558mm)" to 55 inch (1395mm).

The product is machine washable up to 72°C.

MARINA
SHOWER TROLLEY

harvest

The Harvest Healthcare Marina Shower Trolley delivers safe, dignified and comfortable bathing for patients who are immobile or bed-bound. The trolley lowers to wheelchair height for easier transfers, includes fold-down siderails for added safety, and is fully compatible with all Harvest Healthcare hoists. Designed for ease of use, the Marina features hydraulic height control and an easy-steer system, allowing a single caregiver to manoeuvre the trolley smoothly and efficiently.
To maximise patient comfort and reassurance during showering, the Marina comes complete with a foam-padded PVC liner with side supports and end panels, together with a foam-padded PVC resident support cushion.

KEY FEATURES & BENEFITS

- Low gradient tilt towards foot end for water drainage via integral waste outlet
- Plug and drain hose supplied complete with storage bracket
- Bumpers fitted to all corners for protection during transport procedures
- Removable bumpers to reduce the width to 65cm to access tight doorways
- Lowers to wheelchair height for ease of patient transfer
- Purpose made precision bearings on all pivot points
- Clearance beneath frame for mobile hoist

FREEWAY ASSISTED OR SELF-PROPELLED SHOWER, TOILET AND COMMODE CHAIRS

freeway

Manufactured in the UK from only the highest quality materials, the comprehensive range of Freeway assisted or self-propelled shower, toilet and commode chairs are pioneering and firmly established as having a reputation second to none.

High-quality, robust and durable, they are designed to provide the most effective solution to a client's toileting and showering needs.

Freeway Shower Chairs are of modular design, which means they can be configured to a choice of interchangeable seats, backrests, armrests and footrests.

A multitude of accessories are available to meet individual requirements and ensure the most bespoke solution.

All adult models within the range are specifically designed to fit over a standard toilet or commode, with three widths available:

A – 540 mm (21")

B – 490 mm (19")

C – 440 mm (17")

Paediatric, plus size and models to fit over automatic toilets are also included in the range.

The interchangeable makeup of Freeway Shower Chairs makes the range the most adaptable solution on the market as accessories and parts can be added to suit the changing needs of a client.

Chairs can be manufactured with frames to be lowered and raised; rear wheels set back/ forward and the frame depth extended and shortened.

Prism Medical UK has a team of experienced Assessors who can carry out a comprehensive shower chair assessment to determine the needs of the individual. To ensure the most effective and supportive solution to meet your client's needs, we highly recommend a shower chair assessment is made prior to purchase.

FREEWAY T80 RECLINING SHOWER CHAIR

freeway

The Freeway T80 Shower Chair is highly versatile and the reclined position has significant advantages for increasing comfort and relieving pressure for a wide range of conditions, including:

- Multiple Sclerosis
- Spinal injuries
- Motor Neurone Disease
- Stroke & Other neurological conditions
- Cerebral Palsy

It has two variations; Freeway T80 COM and Freeway T80 AUTO.
Freeway T80 COM: A variation of the T80 reclining shower chair, designed to work seamlessly with the Clos-o-Mat Samoa toilet.
T80 AUTO: A version of the standard T80 which has been modified for use with automatic toilets including the Geberit 8000 range and Clos-o-Mat Palma Vita.

KEY FEATURES & BENEFITS

- This chair reclines through an infinite number of positions up to 45 degrees and is easy to operate.
- The T80 is available in self-propelled versions with a choice of recliners and comes with a wide range of positioning accessories.
- Featuring two high-quality stainless steel gas struts, the tilt action is easy and light to operate.
- Available as assistant-propelled or self-propelled

FREEWAY T70 SHOWER CHAIR

freeway

The Freeway T70 Shower Chair is available as a shower, toilet or commode chair. One of the major benefits of the Freeway T70 is that it is fitted with large-braked rear wheels and push rims making this chair extremely easy to self-propel.

As with all Freeway Shower Chairs, only the finest materials have been used during manufacturing to ensure the shower chair is durable and long-lasting.

The Freeway T70 offers the ultimate in hygiene, as the durable seat, backrest and armrests can be simply wiped down after use. The protective coating of the shower chair includes FREECOTE® – our unique antimicrobial and antibacterial coating which is resistant to the hospital superbug MRSA, e-coli, salmonella and listeria.

KEY FEATURES & BENEFITS

- Available as a shower, toilet or commode chair
- Versions available to fit over Clos-o-Mat toilets, automatic bidets and for those who require easy side access
- Perfect for those who require a chair that is extremely easy to self propel
- Puncture proof rear braked wheels with removable push rims
- Large diameter castors to the rear allow easy manoeuvring over uneven surfaces
- Frame constructed from heavy duty, durable tubing in order to provide years of rust free performance
- Pliable backrest moulds to the user while providing excellent support

EVACUATION SHEET
EVACUATION SLEDGE

harvest

EVACUATION SHEET

The Fire Evacuation Sheet is designed to be used in conjunction with standard foam mattresses. During evacuation, the straps are secured around the mattress and the patient is then evacuated to safety. This sheet features a silicone coated side to aid swift and easy movement of the device across all surface types.

The red polyester fabric is Fire Retardant and extremely strong and has been vigorously tested.

Product Information

Product Code	Description
HTE001	Evacuation Sheet

EVACUATION SLEDGE

The Evacuation Sledge fits underneath the existing active mattress and is designed to suit most mattresses.

It contains a high density foam base so that in the event of an evacuation, the air mattress can be deflated by opening the CPR valves and disconnecting from the pump.

The patient is then securely strapped in and evacuated to safety.

The mattress base has a section of low friction material to make it easier to pull on most surfaces.

Easily accessible emergency straps are hidden in pockets to keep them from fouling profiling bed mechanisms.

Product Information

Product Code	Description
HTE008	Evacuation Sledge for Active Mattresses

harvest

EVACUATION SHEET FOR ACTIVE MATTRESSES

This Evacuation Sheet is designed to take an active air mattress. In the event of an evacuation, the service user is secured to the mattress using the straps on the evacuation sheet and moved to safety along with the mattress. Suitable for both Replacement and Overlay mattresses.
The red polyester fabric is Fire Retardant and extremely strong and has been vigorously tested.

Product Information

Product Code	Description
HTE001.2	Evacuation Sheet for Active Mattresses

WALL MOUNTED EVACUATION MATTRESS WITH STORAGE BAG

This popular product includes a storage bag and is designed to be mounted on a wall until needed. The Wall Mounted Evacuation Mattress includes a 50mm foam base to support the patient during evacuation. During evacuation, the patient is placed on the mattress, secured using the straps provided and evacuated to safety.
The red polyester fabric is Fire Retardant and extremely strong and has been vigorously tested.

Product Information

Product Code	Description
HTE002	Wall Mounted Evacuation Mattress with Storage Bag

STAIRWAY EVACUATION

harvest

EMERGENCY STAIRWAY EVACUATION DEVICES

Regulations require that your emergency plan should be appropriate for your premises, and arrangements should be in place for the safe evacuation of people identified as being especially at risk. With these unique chairs, evacuations can be carried out by only one person, giving you a better chance of getting your patients out in time. These chairs can fold down for easy storage and include wall mounting brackets.

EXITMASTER EGO

The Exitmaster Ego is easy to use and is ultra-slim for storage. It has two wheels with auto brakes when folded. It provides a comfortable and supportive seat position and includes a wall mounting bracket. The safe working load is 150kg / 24 Stone.

Product Information

Product Code	Description
HTE202	Exitmaster Ego

EXITMASTER VERSA

The Exitmaster Versa has a 4 wheel design meaning it travels well on landings, corridors and stairs. The seat offers excellent support and comfort and aids easy transfer with an advanced belt guide system. There is also a footrest for comfort. It has safety brakes on the rear wheels and includes a wall mounting bracket. The safe working load is 150kg / 24 Stone.

Product Information

Product Code	Description
HTE200	Exitmaster Versa

EXITMASTER ELITE

The Exitmaster Elite has a 4 wheeled design meaning that it travels well on landings, corridors and stairs. This Exitmaster provides extra comfort with a padded seat and arm rests and an advanced head rest with head band. It also has a footrest. There is an integral 4 point harness and a wall mounting bracket. This stairway evacuation device can double as a transit chair.
The safe working load is 150kg / 24 Stone.

harvest MATTRESS MANAGEMENT GUIDE

The mattress management programme is a simple, easy and cost-effective way to manage your active mattresses.

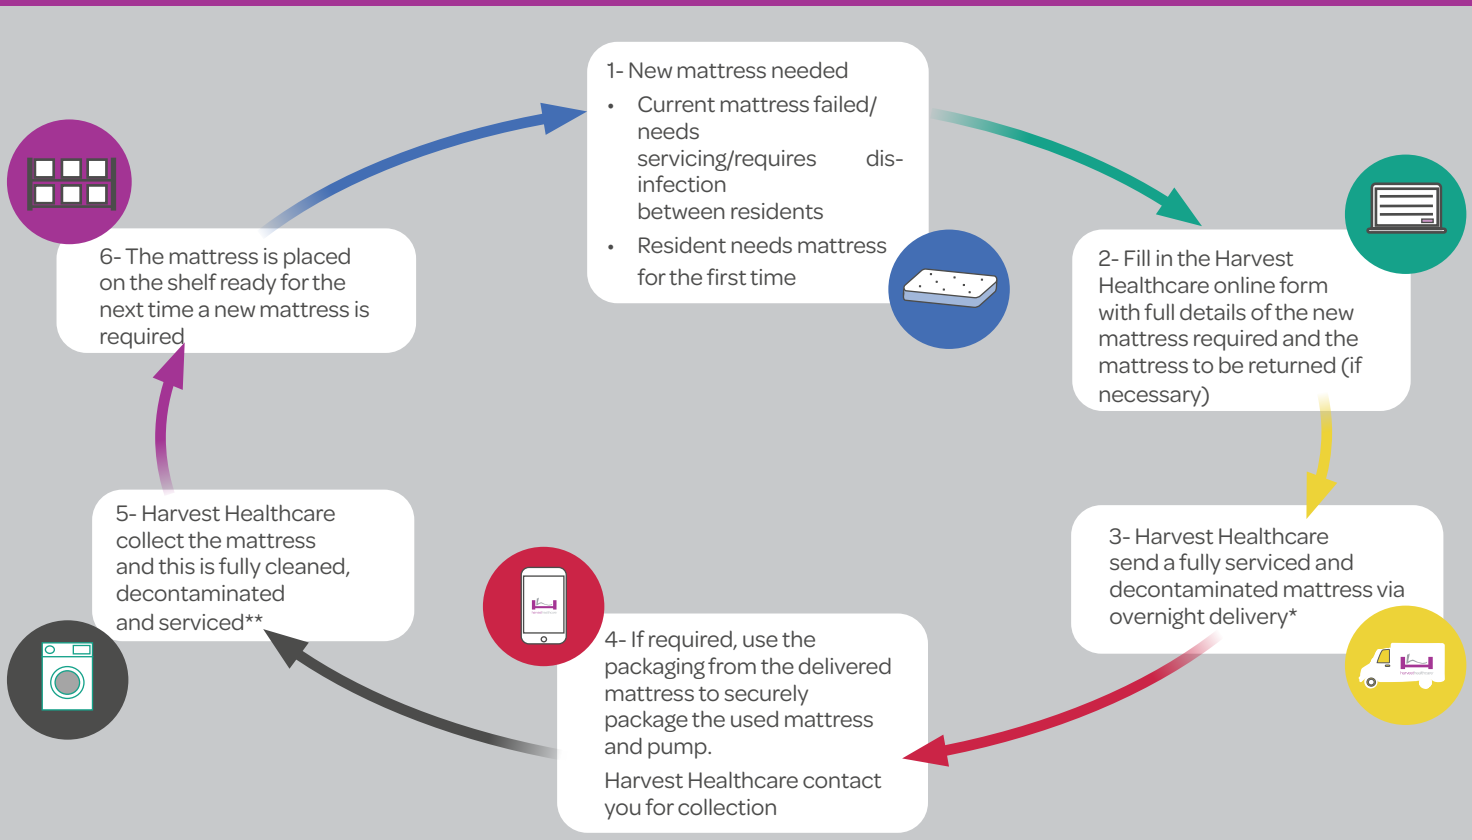

Just ask for an active mattress when you need one and receive a fully decontaminated and serviced mattress the very next day*.

We will come and collect your old mattress, ready to be cleaned, serviced and stored for the next time it is needed.

All our decontamination is done to Public Health England standards with Coronavirus certified cleaner, and each mattress is given its own decontamination certificate.

This ensures safe transfer of mattresses between residents, and peace of mind for you.

Never store, wash, or repair active mattresses again, and keep your residents safe and well, with the Harvest Healthcare mattress management programme.

*Next day / overnight delivery available if ordered before 12pm.
**Decontaminated to HTM01-04 and serviced according to ISO13485. Mattress supplied will be similar specification to mattress collected (if applicable).
